Thunderstorms over a majority of the fire area last night and this morning provided a wetting rain.

Rainfall amounts over last 24 hours (16:30-16:30 AKDT) ranged from 0.07" to 0.97" inches. These values were recorded from three RAWS stationed around the fire's perimeter.

The rain has significantly diminished fire activity, with most locations showing minimal activity overall.

Although some areas have shown diminished activity, the fire is holding in exceptionally dry deep duff and heavier fuels.
