Helicopter 2AE reported this fire as an acre in black spruce with a moderate rate of spread. J-92 was dispatched to assess values at risk and possibly take action on the fire. Upon arrival, fire behavior had increased markedly, and the smokejumper spotter determined that 12 jumpers on the aircraft would not be able to fully suppress the fire in a reasonable amount of time (based on resource drawdown and high fire and fuel indices elsewhere). No values at risk were observed. Fire area will continue to be monitored as conditions and resource availability allows.

This Complex includes: 18,231 acres combined in the following fires.

297---Kobe Road
 289---Nenana River 2
 288---Nenana River
 285---Birch Creek
 257---Teklanika
 325---Shores Landing

Temperatures remain above average but not as warm or dry as previous days. The Chinook wind event continued today, but is expected to taper off Monday afternoon, but there is a threat of afternoon thunderstorms beginning Monday that have the potential to produce outflow winds. The fires to the southwest of the Anderson Complex were very active starting in the late morning. This activity brought significant smoke that shaded the Anderson Complex. The Birch Creek and Shores Landing fires were most active with movement to the north and northwest. The Teklanika River fire had minimal growth backing to the south and southwest. Resources continue to assess values at risk and implement structure and point protection.
