Fire behavior today was moderate with mostly Rank 1 and Rank 2 observed in unburned green islands and jackpots on the northwest/north/northeast flank. Isolated torching interior in fallen trees. No new growth on the northwest end of the fire, minimal on the east flank. Gusty and erratic winds were observed throughout the day but had minimal impact on fire behavior. Trees continue to come down across the burn area. Crews have nearly completed saw line around northern edge of fire and will be working from both the top and bottom towards each other on east flank. A new heli-spot (H-5) was approved west of the fire on the ridgeline and blivits were flown in to support mop-up operations at the higher elevations. Mop-up is going well on the west flank with 50 feet in, up to the saddle. Sprinkler kits are deployed allowing for efficient use of available personnel.

A new water source was identified and improved to support eastern flank perimeter control and mop-up operations.
