Fire spotted via VIIRS heat signature was later flown. Fuel type brush, 50-60% active, fire looks hung up in a riparian area, with a good wind on it and may possibly escape the riparian area, continuous brush.

899 Name: **Anderson Complex** Cause:

This Complex includes: 50,830 acres combined in the following fires.

297---Kobe Road
 289---Nenana River 2
 288---Nenana River
 285---Birch Creek
 257---Teklanika
 325---Shores Landing
 286---Bear Creek
 287---Rock Creek

With higher minimum RH's and excellent overnight recoveries, smoldering and creeping were the dominate fire behavior across the complex. With higher temperatures and winds speeds expected over the weekend, fuels may be more available, but smoke should clear out of the fire area. Resources continue to secure hot spots and the fire edge around structures and will be prepared to implement defensive actions if necessary.

Personnel continue to recon this fire. Colder temperatures and more damp conditions have forced this fire to stay in the same footprint over the last several shifts. Plans are being made to reduce the amount of personnel assigned to this incident while still maintaining a presence and monitoring it.

Fire behavior today was low with isolated pockets of Rank 1 on the east flank at the toe of the slope. No new growth on the fire perimeter. Trees continue to come down across the burn area in earnest. Crews continue to improve control lines on the north side and east flank. Crews have mopped up 75` in along the full length of the west flank and northern edge. Crews have mopped up 50` in on the southeast portions of the fire. Inadequate water sources and elevation gain have made for a challenging hose mop up operation. Terrain and water supply locations necessitate the need for additional pumps throughout the hose lay for adequate pressure and volume to support mop up operations.
