PNQF99 Owner: **State** Unit: **AKDNS-AK Dept. Natural Resources**
899 Name: **Anderson Complex** Cause:

This Complex includes: 58,933 acres combined in the following fires.

297---Kobe Road
 289---Nenana River 2
 288---Nenana River
 285---Birch Creek
 257---Teklanika
 325---Shores Landing
 286---Bear Creek
 287---Rock Creek

With the continued scattered moisture along with higher minimum RH's and excellent overnight recoveries, smoldering and creeping were the dominate fire behavior across the complex. There was some group torching experienced during the afternoon. This week will bring cooler temperatures and higher RH's with a possibility of afternoon thunderstorms, which will continue to tamper fire behavior. Southwesterly winds will be of concern on Thursday with gusts up to 20 mph possible. Threat to values at risk remains but is reduced. Resources continue to secure hot spots and the fire edge around structures and continue to secure line around allotments. Suppression Repair has begun and will continue through the week. The Rose Hip Creek and Clear Sky areas evacuation status has changed to Ready and the evacuations for Kobe Ag and North Forties has been lifted.

All residences in the Haystack subdivision have been moved out of SET status into READY.

Efforts are focused on direct containment efforts on the southern and southeast portion of the perimeter. An indirect contingency line has been completed from the southwest corner of the fire west to the Elliott Highway to protect Allotments and residences. Another indirect check line has been completed west of the fire and north of the Elliott Highway to keep fire out of a steep and narrow section of the Highway corridor. Site protection for at-risk residences in Haystack and the Elliott corridor is in place and a masticated indirect fuelbreak running down the ridge from Haystack toward the Chatanika River is being implemented.

Fire spread to the north threatens few values and will be monitored. Site protection is in place for two BLM public use Cabins in the White Mountains and an area closure is in place.

The Agencies have provided turn-back specifications, a repair plan, and an updated WFDSS decision. Most of the resources necessary to meet protection objectives are already assigned to the incident, however additional orders will need to be placed for repair equipment once the fire is secure.

An IMT extension has been submitted to allow time for completion of suppression objectives, crew demobilization, and initiation of repair operations prior to transition with a Type 3 organization.
