Questions	101

Information Exchange

In the beginning there was paper and pencil. All wildland fire data was recorded by hand and maintained in hard copy form. When new information became available, dispatchers were tasked with updating this information by hand in many locations to keep fire data accurate. This was time consuming and tedious.

In recent years, computers and applications were developed for ease and accuracy. This became a better way to document and maintain fire data but was also problematic. As new information was made available, the dispatcher would have to update that information in all relevant applications. This was time consuming and error ridden.

IRWIN

IRWIN is our remedy to this problem. Thanks to IRWIN, once one application is updated, it ‘talks’ to the other applications and disseminates the updated information to applicable applications. This helps ensure that accurate data lives in all data locations (well maybe not ALL locations...)

- Dispatchers are the first line of defense for quality fire data
- IRWIN helps applications ‘talk’ to each other and share information
- IRWIN ensures the latest, most accurate information is available in all applications

Depiction of Applications 'Talking' In IRWIN

Figure 1 is a depiction of how the fire applications 'talk' to each other through IRWIN.

The graphic above is a visual representation of how information is exchanged between applications in IRWIN. For example, when information is updated in IFM or WildCAD, that CAD 'talks' to various other applications updating them with latest data. When all applications are working correctly, IRWIN 'flows' so that information is passed and shared to all included applications.

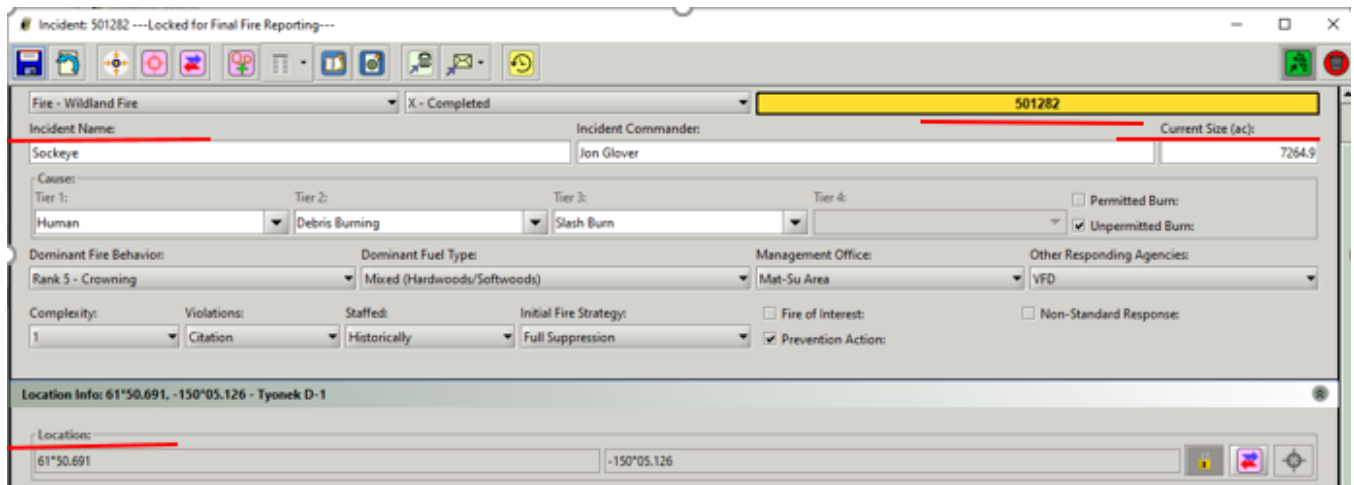

Creating an Incident in IFM

'New Incident' button in IFM.

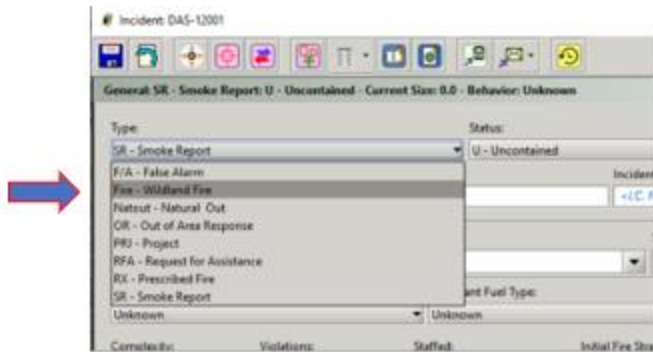

When creating a new incident in IFM, there are 6 initial fields that must be populated for information to begin to flow through IRWIN:

- Location - latitude/longitude (at least rough coordinates)
- Start time (this automatically populates when an incident is created, time can be modified)
- Fire name/Incident name (Follow local protocol for naming the incident)
- Incident/fire number from AICC
- Size (Update this box with the most updated information)

Then

After those steps are complete, change the 'Type' drop down to select 'Fire – Wildland Fire.'

Press the 'Save' button 

Tip: Remember to Save OFTEN by pressing the blue Save button

Congratulations, you have successfully created an incident in IFM that can 'talk' to other applications though IRWIN.

IFM IRWIN Issues

When IRWIN is NOT talking or flowing, an IRWIN error will occur. When an IRWIN error occurs, dispatchers will not be able to get DOI codes.

IRWIN ERROR

An orange button at the top of the incident screen indicates that an IRWIN ERROR has occurred and information is not flowing to other applications. This must be fixed immediately by checking that all initial needed information has been updated and saved in the incident.

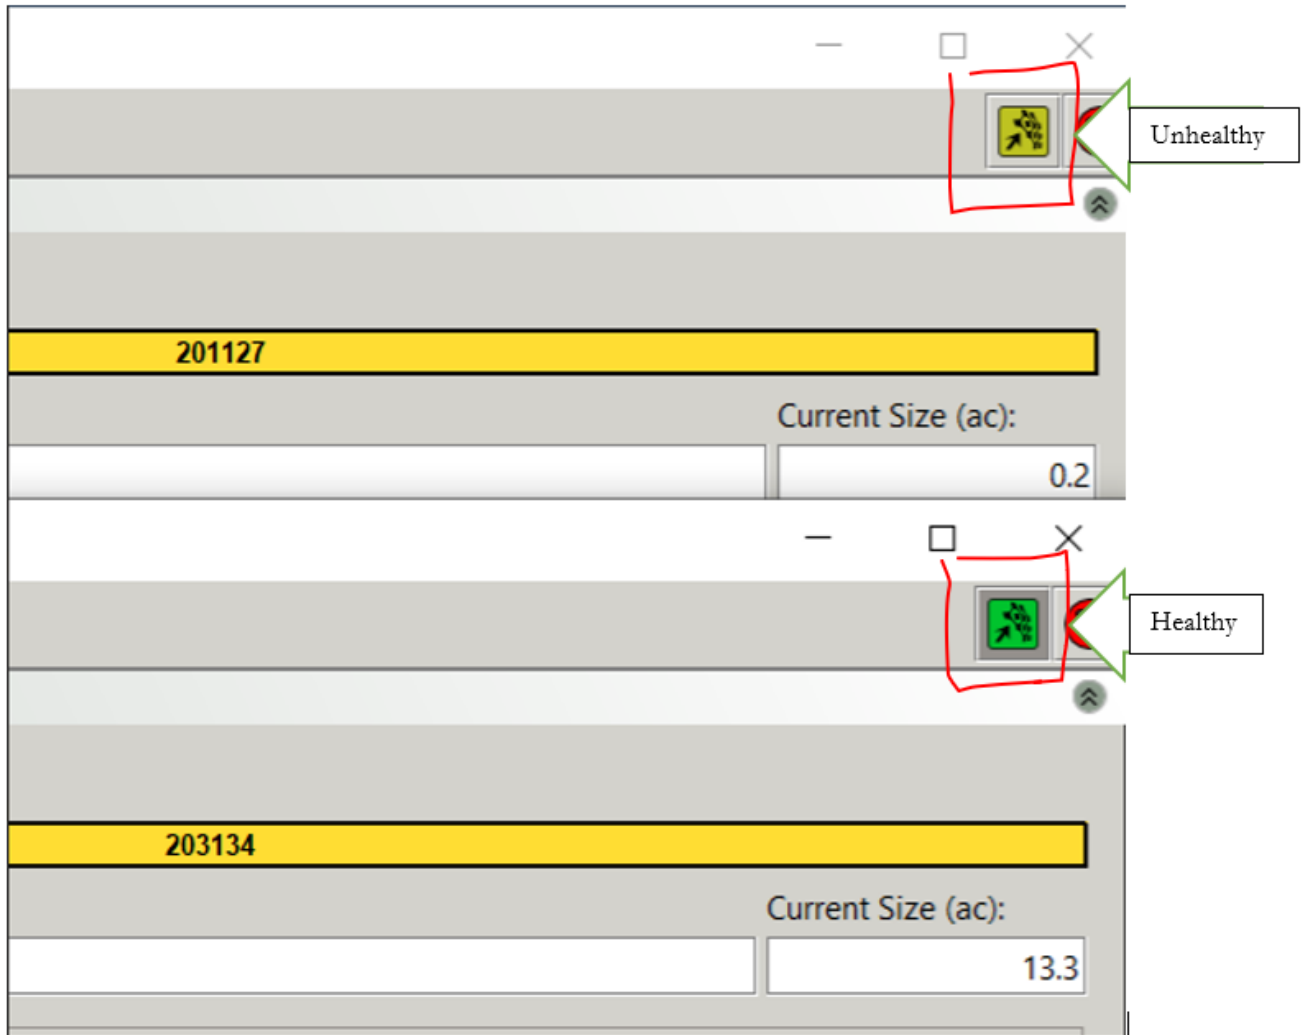

ERROR MESSAGE

Click the orange button to produce an error message.

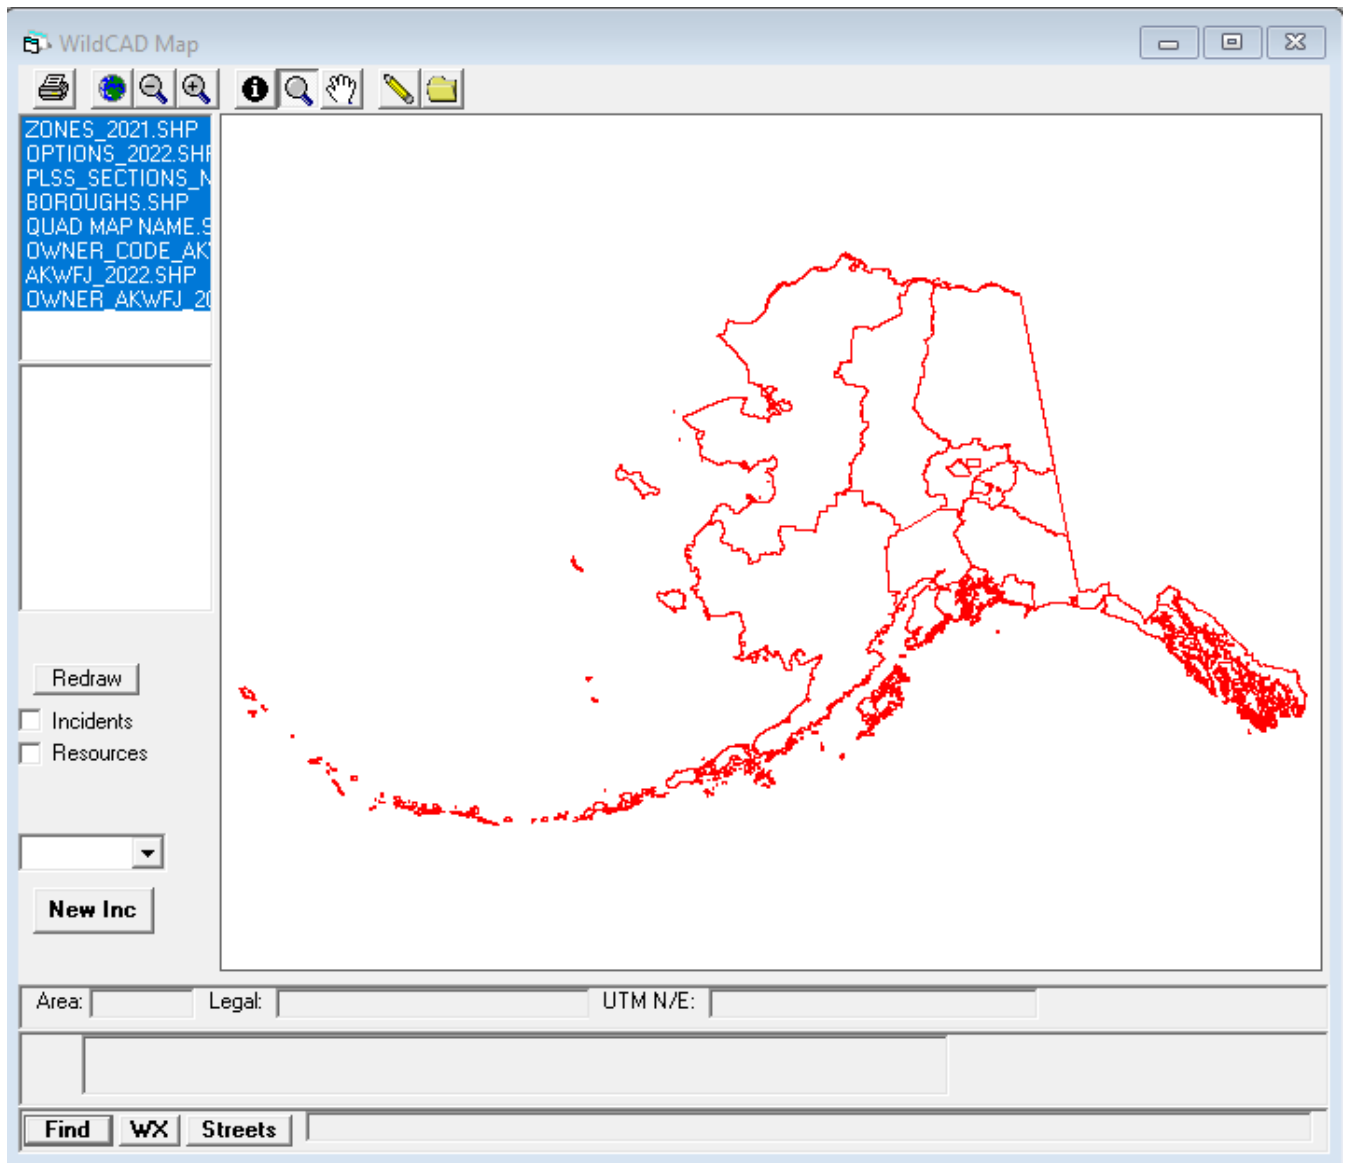

PUSH TO IRWIN BUTTON

- Note the difference between the colors of green in the right-hand corner of the incident log.
- DO NOT push this button.
- The color of this button should be the “healthy” green color.
- If user notices the “unhealthy” green color, there is a problem with IRWIN flowing.

WildCAD (FED)

Please refer to the WildCAD User Guide for more information on WildCAD.

CAD Inputs

Dispatch Log

The dispatch log is where all of fire information lives that comes in through dispatch. This information may become compiled for intelligence reports, may be passed on verbally or may never leave the log but everything must be logged as it comes in.

Examples of what should be logged:

- Initial report of wildfire
- Radio communication
- Phone conversations
- Updates from FMO
- Dispatch Notes and reminders

If in doubt, put it in the log.

If its not in the log, it did not happen.

Many stakeholders are reading your logs. Logs do not have to have correct grammar and spelling, but it is important that someone should be able to understand how the fire unfolded by reading the log.

Type

The four main Types that are used are:

SR – SMOKE REPORT

A smoke report is the initial ‘Type’ of each incident. An incident begins its life as a ‘smoke report’ and will remain a smoke report until resources locate a fire (or need a charge code for aircraft.) This smoke may be from a wildfire, a campfire, a stove, or possibly a cloud that

someone mistook for smoke. Until there is a confirmed fire (or charge code is needed for aircraft, etc.), the incident will remain a 'smoke report' in IFM.

FIRE – WILDLAND FIRE

Dispatchers will select this option when the IC has confirmed there is an actual fire in that location and all other initial inputs have been entered correctly into IFM. It is important to enter accurate information to prevent confusion, while also making sure information is being disseminated in a timely manner. The sooner the fire number gets entered into the CAD, the sooner everyone will be updated. After changing the 'Type' to 'Fire – Wildland Fire' in the CAD, the incident will populate on the AICC Wildland Fire Dashboard. Make sure your location is accurate before changing 'type' to wildland fire.

F/A – FALSE ALARM

When a fire number has been requested by AICC, but no fire was found, that incident is declared a 'false alarm.' Aircraft require a fire number (charge code) to launch and respond to a smoke report or incident. False alarms are often created when an aircraft launched to a smoke report and found no fire, or for afterhours calls that need a charge code.

RX – PRESCRIBED FIRE

A prescribed fire is a planned fire (sometimes called a "controlled burn") is a form of land management in which fire is intentionally applied to vegetation.

IFM

Type:

SR - Smoke Report

F/A - False Alarm

Fire - Wildland Fire

Natout - Natural Out

OR - Out of Area Response

PRJ - Project

RFA - Request for Assistance

RX - Prescribed Fire

SR - Smoke Report

After Selecting the type, press save

WILDCAD

Select the appropriate type in the drop down menu.

Status

There are four main statuses used during the life of a fire. (There are later steps a supervisor will do to close out the fire completely.)

U – UNCONTAINED

All fire incidents auto populate as uncontained when created.

C – CONTAINED

Select 'C – Contained' when IC states that the fire has is contained. Also note in log.

T – CONTROLLED

Select 'T- Controlled' when IC states that the fire is controlled. Also note in log.

O – FIRE OUT – LAST NARRATIVE

Select 'O – Fire Out' when the IC states that the fire is called out. Also note in log.

IFM

Status:

U - Uncontained

C - Contained

F - Finalized

O - Fire Out

T - Controlled

U - Uncontained

X - Completed

Z - Approved

Each Status must be selected from the drop down and saved  in order.

1. Reported
 - a. This time automatically updates when an incident is created
2. Contained
3. Controlled
4. Out

Incident Status Summary: Reported: 06/14/2015 13:13 - Reported Size: 2.0

Order	Incident Status	Date	Size(ac)
1	Reported	06/14/2015 13:13	2.0
2	Contained	07/10/2015 21:15	7264.9
3	Controlled	07/22/2015 10:38	7264.9
4	Fire Out	10/01/2015 13:45	7264.9

In the 'Incident Status Summary' in IFM, each status will be time and date stamped. IFM users can go into the 'Incident Status Summary' section of the IFM incident and adjust the time and date stamp to reflect actuals if not saved at the correct time.

If the incident is reported from an earlier date/time, change the "Reported" time and date to match.

STATUS IN AK SIT REPORT

Status in the SIT Report is slightly different from IFM.

Daily Report From: 05/29		1,296.0 Acreage Change Since 05/28
LSP7	Lat: 63:54:22.7	Status: S/U
932077	Lon: 146:00:07.6	Acres: 28,000.0 Option: Limited
PDL8P7	Owner: DOD	Personnel: 124 Start Date: 04/30 Area: MID
077	Name: Oregon Lakes	Unit: AKFWQ-Fort Wainwright, Donnelly TA Cause: Human

Point protection continued around values potentially at risk. Wind today was significantly lower than previous days, contributing to diminished fire behavior. Additional point protection considerations may be made due to potential for higher winds in the coming days.

The first letter signifies if the fire is Staffed or Unstaffed.

S = Staffed, U = Unstaffed

The second letter signifies if the fire is Uncontained or Contained/Controlled

U = Uncontained, C = Contained/Controlled

Fire Numbers

WHAT IS A FIRE NUMBER?

A fire number and an incident number are the same. Each wildland fire requires a unique number to keep resources, orders, time, and other important information separated out by fire.

HOW TO OBTAIN A FIRE NUMBER

Fire Numbers are requested through AICC on the TTY. (see TTY section)

REMINDERS

- Only Fires and False Alarms receive fire numbers. Once a fire number has been issued for the incident, the incident will either become a Wildland Fire or a False Alarm by adjusting the Type field in the CAD.
- False Alarms can be charged to like a fire number.
- Smoke Reports Do Not receive a fire number unless an aircraft responds, or it is after hours and need a charge code.

IFM

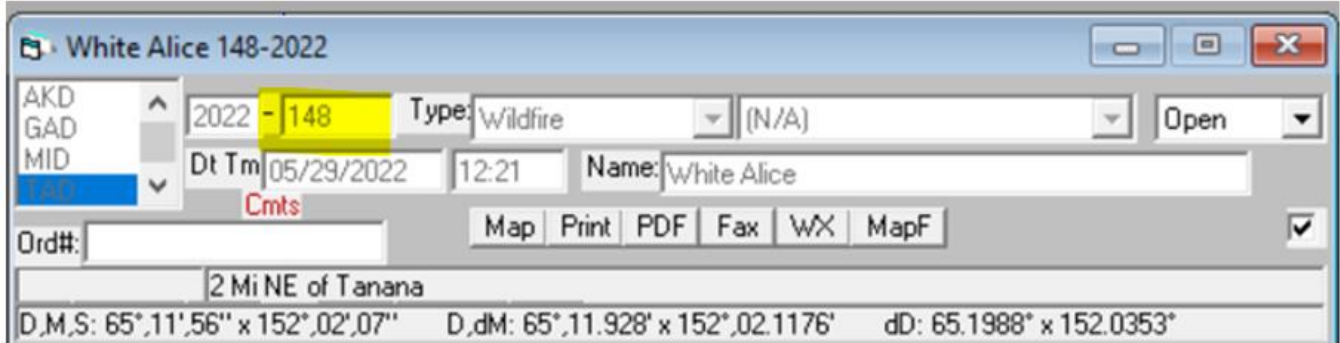

Update fire numbers in IFM ASAP by deleting the smoke report number and typing the 6-digit fire number into the yellow 'Incident Number' field in IFM.

Incident Number:
203021

Remember to press save  for IRWIN to flow.

WILDCAD

Update fire numbers in WildCAD by entering in the last 3 digits of the fire number in the field next to the year field.

The screenshot shows the WildCAD software interface for a fire record titled "White Alice 148-2022". The interface includes a list of fire types (AKD, GAD, MID, Wild) on the left. The main form contains the following fields: Year (2022), Fire Number (148), Type (Wildfire), Name (White Alice), Date Time (05/29/2022 12:21), and Ord#. Below the form are buttons for Map, Print, PDF, Fax, WX, and MapF. The location is specified as "2 Mi NE of Tanana" with coordinates: D,M,S: 65°,11',56" x 152°,02',07"; D,dM: 65°,11.928' x 152°,02.1176'; and dD: 65.1988° x 152.0353°.

Size

CURRENT SIZE

- Fires are always greater than or = to .1 acres
- .1 acre is the smallest number a fire can be in CAD
- When you start a smoke report, start your incident at .1 if no other size intel is available
- Change size info by updating the 'Current Size'/'Acres' field
- Save

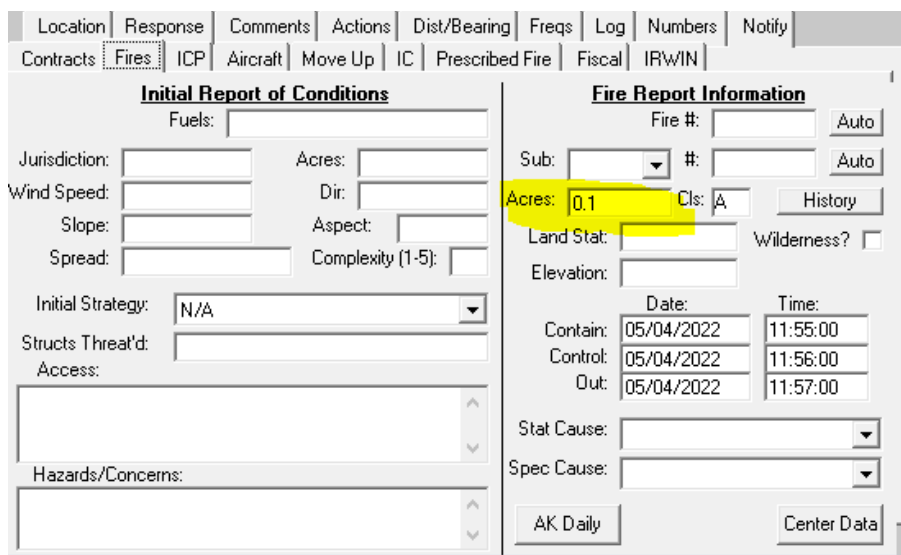

POINT OF ORIGIN

- Ensure the point of origin is inside the perimeter
- Prompt field personnel for updated lat/long from Point of Origin (POO)

IFM

WildCAD

LAND STATUS

If a fire grows off the point of origin land status, secondary land statuses will have to be added to reflect this. GIS does this but users will see this information populate in IFM.

IFM

The 'Total Size' under 'Land Status' must match the 'Current Size' field. If there are no secondary land statuses, the 'Size' field in the 'Point of Origin Land Status' must match the 'Current Size' field.

The screenshot shows the 'Land Status' interface for 'Cook Inlet Region, Incorporated'. It includes fields for 'Fiscal Responsibility' (AFS), 'Jurisdictional Agency' (AFS/Regional Corps), 'Mgmt Option' (Full), and 'Unit' (AKCIN Cook Inlet Region, Incorporated). A 'Size' field is highlighted with a red box, showing '972.4 ac'. Below this is a table of 'Secondary Land Status' with columns for 'Unit', 'Management Option', and 'Size'. The table lists four entries: AKDNS AK DNR-Mental Health Trust (438.4), AKKNR Kenai National Wildlife Refuge (7138.8), AKAKS Kenai Peninsula Borough (164.8), and AKPRI Private (161.6). A 'Total Size (ac): 8876.0' field is also highlighted with a red box.

Unit	Management Option	Size
AKDNS AK DNR-Mental Health Trust	Full	438.4
AKKNR Kenai National Wildlife Refuge	Full	7138.8
AKAKS Kenai Peninsula Borough	Full	164.8
AKPRI Private	Full	161.6

WildCAD

WildCAD only has a total 'acres' field. Their other land ownerships are broken out behind the scenes. Ensure that the total acres from GIS matches the 'Acres' field in WildCAD.

FIRE PERIMETERS

When an IC sizes up the fire, they report an estimated size. Larger fires may have more accurate mapping done by GIS. To confirm that the CAD has the most accurate size information, regularly check the 2023 Alaska Fire Ownerships for Fire Origins and Fire Perimeters on the AICC webpage to see the latest size information from GIS.

AICC > Predictive Services > Intelligence Reports > 2022 Fire Data > Fire Ownership

2022 Alaska Fire Ownerships For Fire Origins and Fire Perimeters

This is based on Fire Perimeters, Fire Point Data, Management Options, and the Alaska Wildland Fire Jurisdictions Dataset

Ownership Breakdown Size: 0.1											

Cause

The cause must be updated in the CAD. This may be stated in the initial size up but ask IC if unsure. Alaska currently maintains cause records up to Tier 3.

Make sure each box has a value in it when entering in IFM.

NATURAL

- Natural = Lightning
- The only natural cause of a fire is lightning.
- Check the lightning map to see if there have been any strikes in the past few days.
- AICC > Fire Weather > Lightning

Cause:				<input type="checkbox"/> Permitted Burn:
Tier 1:	Tier 2:	Tier 3:	Tier 4:	<input type="checkbox"/> Unpermitted Burn:
Lightning	Lightning	Lightning		

HUMAN

If a fire was Not caused by lightning, the fire is a 'human caused' fire. Human caused does not equal arson. For example, a raven that got electrocuted from a telephone wire and fell off and started a ground fire is a 'human' caused fire. If there has been no lightning in the fire location for an obvious amount of time, the fire cause is human.

Cause:				<input type="checkbox"/> Permitted Burn:
Tier 1:	Tier 2:	Tier 3:	Tier 4:	<input checked="" type="checkbox"/> Unpermitted Burn:
Human	Campfire	Campfire		

Cause:				<input type="checkbox"/> Permitted Burn:
Tier 1:	Tier 2:	Tier 3:	Tier 4:	<input checked="" type="checkbox"/> Unpermitted Burn:
Human	Debris Burning	Slash Burn		

Cause:				<input type="checkbox"/> Permitted Burn:
Tier 1:	Tier 2:	Tier 3:	Tier 4:	<input checked="" type="checkbox"/> Unpermitted Burn:
Human	Children	Children		

If a fire is known to be not natural but is still being investigated, update IFM to reflect this.

Cause:				<input type="checkbox"/> Permitted Burn:
Tier 1:	Tier 2:	Tier 3:	Tier 4:	<input type="checkbox"/> Unpermitted Burn:
Human	Under Investigation	Under Investigation		

Users may need to dig around in specific and detail to find the right one. As you can see below, 'Miscellaneous' must be selected in Tier 2 to be able to select Structure in Tier 3.

Cause:				<input type="checkbox"/> Permitted Burn:
Tier 1:	Tier 2:	Tier 3:	Tier 4:	<input type="checkbox"/> Unpermitted Burn:
Human	Miscellaneous	Structure		

UNDETERMINED

Cause is or 'Human' or 'Natural.' 'Undetermined' is allowed but please update as soon as better information becomes available. Only 'General Cause' shows on the report. 'Undetermined' is ok for a moment but change ASAP.

AICC is required to report causes to NICC and there are only two options: Human or Natural. If the cause is left as undetermined, educated guesses will be made for this reporting by the INTEL desk.

FALSE ALARM

Although false alarm is not an actual cause, if a fire is declared a 'false alarm,' select F/A in cause drop down menu.

The image shows a screenshot of a web form for selecting a cause. It features four dropdown menus labeled Tier 1, Tier 2, Tier 3, and Tier 4. The Tier 1 dropdown is currently set to 'F/A'. To the right of the dropdowns are two checkboxes: 'Permitted Burn' and 'Unpermitted Burn', both of which are currently unchecked.

Initial Fire Strategy

Initial Fire Strategy is based on the actions taken in the first 12 hours of the IA. Initial Fire Strategy does not change even if the strategy changes later in the fire's life. This field is **not** the same as the "Strategy Field" in the 209 (which does change).

FULL SUPPRESSION

Take suppression action within the first 12 hours.

POINT ZONE PROTECTION

Protects specific assets or highly valued resources from the wildfire without directly halting the continued spread of the wildfire.

CONFINE

Restrict the wildfire within determined boundaries, established either prior to, or during the fire. These identified boundaries will restrict the fire, with no action being taken to put the fire out.

MONITOR

To observe fire but take no action due to lack of resources, land status, or values at risk, etc.

Ask a supervisor what to select for 'Initial Fire Strategy.'

Charge Codes

DOI CODE

When federal resources are responding to a fire, including federal tactical aircraft, the 'Fire Code Request' button must be pushed and then saved. This may take up to several minutes, but the DOI Fire Code field will populate. All required fields must be populated for this to work.

USFS CODE

Once the DOI code has populated in IFM, add the code in the USFS field below regardless of known FS employees on the fire. Add the prefix "PN" to the beginning of the code for fire on State Protection.

IFM

Incident Details: DOI: N2VW - USFS: PNN2VW - Remote - Approved? (No)

DOI Fire Code: N2VW FS Assist: Fire Code Requested

USFS: PNN2VW FEMA #: _____

121	PNC3		PPNC3	05/21	M	ANCSA	GAD	Koyuk Dump

It is important to keep the fire numbers updated in IFM so that resources can find their charge codes when referring to this list.

Calling a Fire Out

When the IC calls a fire out in the field, take the following steps to call the fire out the CAD.

- Change Status to ‘Out’ in CAD
- Make sure all required fields in CAD are populated
- Write final narrative for fire
- Enter “0” in Daily person’s box
- Enter cost
- Press complete button – the button will turn from red to gray after it has been pressed

False Alarms

- The status 'False Alarm' is appropriate to utilize when a fire number has been requested from AICC but no actual fire was found.
- Time can be charged to False Alarm numbers.
- False Alarms should be closed out in CAD ASAP. Make sure you follow all steps to properly close out a False Alarm.

IFM

- Change Type to 'F/A – False Alarm'
- Set Status to 'Uncontained'
- Add fire Number
- Leave IC name blank or remove IC name
- Add 'F/A' in front of Incident Name
- Ensure 'Current Size' / 'Acres' Field is set at zero
- Remove all dates under Incident Status Summary with exception to the 'Reported' date/time
- Change Cause to 'F/A'
- Press Save

Incident: 203015 ---Locked for Final Fire Reporting---

General: F/A - False Alarm: F - Finalized - Current Size: 0.0 - Behavior: Unknown

Type: F/A - False Alarm ✓ Status: F - Finalized Incident Number: 203015 ✓

Incident Name: F/A China Poot ✓ Incident Commander: Oberholtzer Current Size (ac): 0.0

Cause: Tier 1: F/A ✓ Tier 2: Tier 3: Tier 4: Permitted Burn: Unpermitted Burn:

Dominant Fire Behavior: Unknown Dominant Fuel Type: Unknown Management Office: Kenai-Kodiak Other Responding Agencies: None

Complexity: Violations: Historically Initial Fire Strategy: Fire of Interest: Non-Standard Response: Prevention Action:

Location Info: 59°40.611, -151°25.463 -

Frequencies: No

Site Info: Topo: Unknown - Aspect: Unknown - Slope: 0-25 - Elevation: Unknown

Values at Risk: Daily Threatened: 0 - Total Lost: 0

Incident Status Summary: Reported: 04/19/2022 18:09 - Reported Size: 0.1

Order	Incident Status	Date	Size(ac)
1	Reported	04/19/2022 18:09	0.1
2	Contained		0.0
3	Controlled		0.0
4	Fire Out		

After you have changed your fire to a False Alarm, add cost and press the complete button to close out.

No narrative required for a false alarm.

Notify AICC of F/A

When a fire number becomes a False Alarm, notify AICC via the TTY.

For example:

AICC

Fire # 201154 is F/A

PAQ, KKH, 5/30/22 15:15

Numbering false alarms is an old practice that is no longer needed.

Narratives & Night Report

A narrative is a brief written snapshot of the fire. All 'New' and 'Staffed' fires require a daily night report, as well as fires called 'out' that day. These narratives feed to the AICC SIT Report and the AICC Wildland Fire Dashboard.

The night report is the package of a narrative, cost, and amount of personnel spending the night completed in IFM of WildCAD.

Components of a Narrative

The daily narrative is a brief synopsis of the fire during the previous operational period. The narratives are compiled in the daily Alaska Situation Report and the AICC Wildland Fire Dashboard that is accessed by both fire personnel and the public. Use complete sentences and correct grammar.

Use this as a guide to writing night reports. Not everything in the log is pertinent to the night report.

1. Time (if critical part of picture)
2. Who discovered or reported the fire (no names)
3. General location
4. Size
5. Behavior
6. Fuels
8. Weather
9. Resources and values at risk
10. Response OR nonstandard response due to ... (What was the response? If it was nonstandard why? Ex No smoke jumpers available, no crews avail, no aircraft, etc.)

Give good descriptions of fire behavior and fuels. This helps the weather and fuels people to hone their forecasts.

Narratives and other information are setting a scene. If a narrative states that a village evacuation is going on and the fire is only .1 acre in the CAD.....hmmm. The public now has access to most of the same tools we have. Look at the VIIRS heat signatures and make a guess, it doesn't even have to be that close, just enough to make the point.

IFM

In IFM, narratives will be entered into the 'Narrative' field in the 'Night Report' section of the incident. Type your narrative in a Word document first and copy and paste into 'Narrative' field to catch spelling and grammar mistakes.

The screenshot shows the IFM software interface for incident 501282. The window title is "Incident: 501282 ---Locked for Final Fire Reporting---". The interface includes a toolbar, a status bar, and several data entry sections. The "Night Report" section is active, showing "Night Report Req'd? (No) - Tot. Cost to Date: \$8462446 - Last Submitted at: 10/01/2015 13:47". Below this, there are fields for "Daily Costs(\$)", "Total Costs to Date(\$)", and "Daily Pers.". The "Narrative" field is a large text area where the incident description is entered. The "Cost Comment" field is also visible. The "Resources" and "Attachments" sections are at the bottom. The status bar shows "Last Update: 10/15/2015 09:38 (jgregg)".

WildCAD

In WildCAD, the narrative will be entered into the 'AK Daily' field. Make sure correct date is selected.

The screenshot shows the WildCAD software interface for an "AK Daily" record. The window title is "AK Daily UYD-2019-555017 New". The interface includes a toolbar, a status bar, and a data entry section. The "AK Daily" section is active, showing a table with columns "Date", "Personnel", "Cost", "Last Updated", and "By". The table contains one record: "04/12/2019", "8", "\$20,000", "04/19/2019 12:13", "BW". Below the table, there is a form for adding a new record for a specific date. The "Add new record for date:" field is set to "04/22/2019". The "Add" button is visible. Below the form, there is a large text area where the incident description is entered. The "Personnel" and "Cost" fields are also visible at the bottom. The status bar shows "Last Update: 10/15/2015 09:38 (jgregg)".

Date	Personnel	Cost	Last Updated	By
04/12/2019	8	\$20,000	04/19/2019 12:13	BW

Add new record for date: 04/22/2019 Add

Fire was reported by passing commercial aircraft. J-12 responded from Ladd Field. Fire is 25 acres, with 30% of the perimeter actively burning. Fire behavior is creeping, with 1-3 foot flame lengths, burning in black spruce. J-12 deployed 8 smokejumpers to begin suppression activities. Anticipated containment is 4/14 at 2000.

Personnel: 8 Cost: 20000 Save Edits Delete

Names & Spelling

- No Names of individual people unless T1 or 2 IC name. Legal ramifications.
- Name VFD cooperators - they love the glory of their name in lights!
- May use names of Crew and Mods such as White Mountain and Alpha Squad
- Spell out the words **demobilization** and **precipitation**

Capital Letters

- Cardinal directions are capitalized but the word is not always capitalized. **NW**, **SW**, **SE**, **NE**, northeast, southeast.... north side of the fire
- white spruce, black spruce, birch, (these words are not capitalized)
- **F**orestry and **P**revention (these words are capitalized)
- **L**imited, **M**odified, **F**ull, **C**ritical (these options are capitalized)

Finishing Details

To complete the night report:

IFM

- Add the number of people remaining overnight on the fire in the 'Daily Pers.' field
- Press the 'Completed' button to push to IRWIN. The 'Completed' button will gray out once it has been pushed.

CONFIRM NIGHT REPORT SUBMITTED

To confirm completed button was pushed and all information flowed though IFM, press the yellow 'history' button.

The Blue Line indicates that the complete button has been pushed and information is flowing through IRWIN for that date.

If no blue line in today's date, no narrative will not show up on Incident Report.

WildCAD

- Add the number of personnel remaining overnight in the 'Personnel' field
- Press 'Save Edits'

The screenshot shows a software interface with a form. The form has two input fields: 'Personnel' and 'Cost'. The 'Personnel' field contains the value '0' and is circled in red with an arrow pointing to it. The 'Cost' field contains the value '5196'. To the right of the input fields are two buttons: 'Save Edits' and 'Delete'.

Fire Report & Narrative Examples

Examples:

NEWLY DISCOVERED FIRES:

At 1345 a commercial aircraft pilot reported seeing a new fire located approximately 45 miles southwest of Beaver. The fire was approximately 2-3 acres in size, 85% active and burning in white spruce and tundra. The fire plotted in a Full management option area, and it was determined that action needed to be taken. One load of smokejumpers was delivered by smokejumper aircraft J-66 along with zone helitack personnel with helicopter N34954. No additional resources were requested.

FIRE LOCATION IN A LIMITED FIRE MANAGEMENT OPTION AREA:

At 1517 zone detection aircraft N114MN discovered the fire located approximately 45 miles south of the village of Selawik. The fire was approximately 10 acres in size, creeping and smoldering in tundra and black spruce and located in a Limited management option area. No action taken.

At 1630 smokejumper patrol aircraft J-17 discovered the fire located 13 miles east of the village of Ambler. The fire was approximately 15 acres in size, backing and torching in black spruce and located in a Full management option area. It was determined that action needed to be taken. At 1654 eight smokejumpers were delivered by J-17. Smokejumpers worked to achieve containment and no further resources were needed.

FIRE LOCATED IN A CRITICAL FIRE MANAGEMENT OPTION AREA:

At 1212 a private citizen from the village of Nulato reported a wildfire located about ¼ mile from the end of the Nulato airstrip. The fire was approximately 3 to 5 acres in size, running and torching in black spruce and located in a Critical management option area. It was determined that action needed to be taken. One load of smokejumpers, 2 CL-215 scoopers and Air Attack resources responded and were able to achieve partial containment of the fire by 2200.

UPDATES: ON-GOING FIRES WHEN OBSERVATIONS WERE MADE:

At 1833 the fire was flown by zone surveillance aircraft N9011N. The fire was 30% active, creeping and backing with 3–5-foot flame lengths. The fire size had increased to approximately 550 acres.

The digitized fire perimeter was updated revealing a new size of 475 acres.

Observed fire behavior included smoldering in tundra along the northwest perimeter, creeping in black spruce within the southeast corner single tree torching in black spruce throughout the interior.

At 1833 the fire was flown by zone surveillance aircraft N9011N. There was no smoke showing.

AICC Daily Situation (SIT) Report

What is the SIT Report?

The SIT Report is a daily (during fire season) report created by AICC that “captures incident activity and resource status information in summary form” from the day before. Think of it like reading a newspaper, you are getting all the news that occurred the previous day.

Locating the SIT REPORT

To locate the AICC SIT Report, go to the AICC homepage and select AICC Situation Report.

The screenshot shows the AICC website interface. At the top, it says "An Interagency Incident Support Website" and "Mobilizing Incident Resources throughout Alaska". The main header includes "AICC Alaska Interagency Coordination Center" and a navigation menu with "National", "AICC Home", "Alaska Fire Service", "About Us", "Links", and "Contact Us". A "Preparedness Level: 2" indicator is visible in the top right. The main content area features a "Welcome to the Alaska Interagency Coordination Center" message. A red box highlights the "AICC Situation Report" link, which includes a file size of "(116 KB)" and a timestamp of "Fri, May 27, 2022 10:22 AKDT". Other links include "AICC Wildland Fire Dashboard" and "Alaska Wildland Fire Information (akfireinfo.com)". A map of Alaska is shown to the right, with various regions labeled. Below the map, there is a paragraph describing the AICC's role and a list of cooperating agencies. At the bottom, there is a "USA.gov" logo and contact information for AICC - Alaska Fire Service.

Sections of the SIT Report

First Page

The first page of the AICC SIT Report provides a snapshot of the New, Out, Active, and Merged fires for each area or zone from the day before. This page breaks down the fires by AFS, STATE, and FS.

Alaska Interagency Coordination Center Situation Report Thursday - 05/30/2019						
Preparedness Level 2

USFS Protection:	0	1	1	0	0	2
Protection Totals:	2	2	2	10	0	16

Second Page

The second page of the SIT report provides a fire status summary, an acreage summary of active fires, a prescribed fire summary and a tally of the fire causes.

Note that there are only Human caused fires and lightning caused fires.

Active Fires Status Summary				
	Staffed		Unstaffed	
	Contained (S/C)	Uncontained (S/U)	Contained (U/C)	Uncontained (U/U)
AFS Protection:	0	1	0	8
DOF Protection:	0	0	2	3
USFS Protection:	0	1	1	0
Status Totals:	0	2	3	11

Active Fires Acreage Summary		
	Acres	Acreage Change
1 New	0.1	
2 Staffed	28,004.0	0.0
13 Monitor	4,766.6	15.3
2 Out	0.8	0.0
2 Prescribed	13,615.0	2,759.0
20 Fires	Total Acres: 46,386.5	

Prescribed Fires					
	YTD Fires	YTD Acres	New	Active	Out Yesterday
Military	2	15,165.0	0	1	0
State of Alaska	1	4.0	0	1	0
Fuels Management Totals:	3	15,169.0	0	2	0

Cause Summary For All Fires (Includes Merged Fires But Not Prescribed Fires)		
	Human: 127	28,453.8 Acres
	Lightning: 11	4,793.4 Acres
Total:	138	33,247.2 Acres

New Fires

This section is for 'New' fires that started the day before. For this example, this SIT Report is from 5/30/2019 so the 'New' fires are from 5/29/19. Most of the labels are self-explanatory but pay special attention to the 'Status' section. The first letter is for Staffed (S) or Unstaffed (U) and the second letter is for Uncontained (U) or Contained Controlled (C). Note that contained controlled is one status, not separate like in IFM.

1 new fire totaling .1 acres.

New		Count: 1	Acres: 0.1
Daily Report From: 05/29	Lat: 60:23:27.7	Status: U/C	0.1 Acreage On 05/29
903157	Lon: 151:17:45.1	Acres: 0.1	Option: Critical
	Owner: State	Start Date: 05/29	Area: KKS
157	Name: Kasilof Beach	Unit: AKAKS-Alaska-Other	Cause: Human

Alaska State Troopers reported a grass fire on the Kasilof beach. One Division of Forestry (DOF) engine responded. Upon arrival, found a 4ft x 4ft area burned in sand and grass. Fire was suppressed, contained, and controlled at 2344 and left in monitor status.

- Fire number is 903157
- This fire started the day before (5/29) because it is in the 'New' section of the SIT Report. See Start Date.
- Charge codes
- Location – Lat/Long
- Owner - State
- Name of Fire – Kasilof Beach
- Status - Unstaffed /Contained Controlled (U/C)
- Acres - .1
- Start date 5/29/19
- Unit - AKAKS

- Option – Critical
- Area - Kenai
- Cause – Human (only 1 tier in AICC SIT Report)

Staffed Fires

This page lists the fires that are staffed or have people remaining overnight on them. You can also see that there is the number of personnel listed for each fire in blue. Under Status, these fires all start with the letter “S” indicting they are staffed. Entering a number in the ‘Daily Pers.’ or ‘Personnel’ field will send a fire to the ‘Staffed’ section of the SIT Report.

Staffed		Count: 2	Acres: 28,004.0	Acres Change: 0.0
Daily Report From: 05/29		1.0 Acreage Change Since 05/28		
L9PU	Lat: 59:18:32.0	Status: S/U	Acres: 4.0	Option: Modified
931154	Lon: 135:42:53.0	Personnel: 28	Start Date: 05/27	Area: TNF
PNL9PU	Owner: BIA	Unit: AKAKA-U.S. Bureau of Indian Affairs		
154	Name: 8.5 Mile	Cause: Human		
No update at this time.				
Daily Report From: 05/29		1,296.0 Acreage Change Since 05/28		
L8P7	Lat: 63:54:22.7	Status: S/U	Acres: 28,000.0	Option: Limited
932077	Lon: 146:00:07.6	Personnel: 124	Start Date: 04/30	Area: MID
PDL8P7	Owner: DOD	Unit: AKFWQ-Fort Wainwright, Donnelly TA		
077	Name: Oregon Lakes	Cause: Human		
Point protection continued around values potentially at risk. Wind today was significantly lower than previous days, contributing to diminished fire behavior. Additional point protection considerations may be made due to potential for higher winds in the coming days.				

- All fires on the Staffed page have personnel remaining overnight. Entering a number in the ‘Daily Pers.’ field in IFM or the ‘Personnel’ field in WildCAD to ensure this fire populates in the ‘Staffed’ section. This number appears in blue in the ‘Staffed’ section of the SIT Report.
- Fire 931154 does not have a narrative 😞 If a user does not enter a narrative, INTEL will attempt to read logs and scrape something together if they have time...

Daily Pers.

Edit Hist. Narrative

Completed

Personnel: Cost:

Monitor Fires

The fires that populate the 'Monitor' section of the SIT Report are unstaffed and monitored by the area. This is understood because they are in the 'Monitor' section of the SIT report, their 'Status' starts with a 'U' for Unstaffed, and there is no personnel count. The SIT Report also states "These fires are currently in monitor status." **Writing "This fire remains in monitor status" again in the narrative is repetitive and adds no new information.**

Monitor		Count: 13	Acres: 4,766.6	Acres Change: 15.3
These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.				
Last Report: 05/28		0.0 Acres Change Since 05/26		
903151	Lat: 60:35:50.8 Lon: 151:19:56.6	Status: U/C	Acres: 0.1 Start Date: 05/26	Option: Critical Area: KKS
151	Owner: Private Name: Veco	Unit: AKPRI-Private	Cause: Human	

There are 13 fires in monitor status with a total of 4,766.6 acres.

FIRE REMAINS IN MONITOR STATUS

“Fire remains in monitor status” can become repetitive and redundant. Below is an example of a fire report where this phrase is used repeatedly along with the status of ‘U/U’ meaning Unstaffed/Uncontained. We as fire personnel monitor all fires that we know of 😊

Daily Fire Summaries					
Day	Status	Acres	Personnel	Daily Cost	Incident Commander
7/11/13	U/U	1,137.0			
The fire was last observed 7/9. Light smoke mostly on the SW, minimal fire activity with some under burning, no acreage gains. The fire is in monitor status.					
7/12/13	U/U	1,137.0			
The fire was last observed 7/9. Light smoke mostly on the SW, minimal fire activity with some under burning, no acreage gains. The fire is in monitor status.					
7/13/13	U/U	1,208.0			
The fire was flown by N9011N. A few smokes were visible. The perimeter was mapped and showed an increase in acreage. The fire remains in monitor status.					
7/14/13	U/U	1,208.0			
The fire was flown by N9011N on 7/13. A few smokes were visible. The perimeter was mapped and showed an increase in acreage. The fire remains in monitor status.					
7/15/13	U/U	1,208.0			
The fire was flown by N40HU on 7/15. The fire had a few isolated smokes on the southwest side. The fire remains in monitor status.					
7/16/13	U/U	1,208.0			
The fire was flown by N40HU on 7/16. The fire had a few isolated smokes on the southwest side. The fire remains in monitor status.					
7/17/13	U/U	1,207.9			
The fire was flown by N40HU on 7/16. The fire remains in monitor status.					
7/18/13	U/U	1,207.9			
The fire was flown by N40HU on 7/16. The fire remains in monitor status.

The fire was flown by N40HU on 7/16. The fire remains in monitor status.					
7/22/13	U/U	1,207.9			
The fire was flown by N40HU on 7/16. The fire remains in monitor status.					
7/23/13	U/U	1,207.9			
The fire was flown by N40HU on 7/16. The fire remains in monitor status.					
7/24/13	U/U	1,207.9			
The fire was flown by N40HU on 7/16. The fire remains in monitor status.					
7/25/13	U/U	1,207.9			
The fire was flown by N40HU. Minimal activity was reported with isolated pockets of smoke on the NW edge. The fire remains in monitor status.					
7/26/13	U/U	1,207.9			
The fire was last flown on 7/25. The fire remains in monitor status.					
7/27/13	U/U	1,207.9			
The fire was last flown on 7/25. The fire remains in monitor status.					
7/28/13	U/U	1,207.9			
The fire was last flown on 7/25. The fire remains in monitor status.					
7/29/13	U/U	1,207.9			

Out Fires

Fires listed in this section were called out the day before.

Out	Count: 2	Acres: 0.8	Acres Change: 0.0
Daily Report From: 05/29 0.0 Acres Change Since 05/28			
911156	Lat: 64:19:38.1 Lon: 146:23:44.6	Status: Out 05/29 Personnel: 14	Acres: 0.5 Option: Full Start Date: 05/28 Area: FAS
156	Owner: State Name: Junction Creek	Unit: AKAKS-Alaska-Other	Cause: Lightning
H120SH delivered supplies and a short squad to the fire. Fire was gridded by squad, contained, controlled and called out 2150. <u>All resources will demobilize on 5/31/19.</u>			
Daily Report From: 05/29 0.0 Acres Change Since 05/28			
903150	Lat: 59:42:16.0 Lon: 151:22:58.4	Status: Out 05/29	Acres: 0.3 Option: Critical Start Date: 05/25 Area: KKS
150	Owner: State Name: Suchaview	Unit: AKAKS-Alaska-Other	Cause: Human
Personnel checked the fire and found no heat and no smokes. The fire was called out.			

Seeing personnel on an 'Out' fire is questionable. Fire 911156 was called out but still has 14 personnel. The narrative explains that they will be demobilizing the next day.

Prescribed Fires

This section is for Prescribed fires. The heading is Prescribed and the Status as RX.

Prescribed				
	Count: 2	Acres: 13,615.0	Acreage Change: 2,759.0	
Last Report: 05/01				
	Lat: 63:56:02.4	Status: RX	Acres: 13,611.0	Option: NOENTRY
	Lon: 145:36:09.6		Start Date: 02/08	Area: MID
	Owner: DOD	Unit: AKFWQ-Fort Wainwright		
RX1	Name: MID MIPR 2019			Cause: Human
2,755.0 Acreage Change Since 04/30				
Last Report: 05/09				
	Lat: 63:54:01.5	Status: RX	Acres: 4.0	Option: Full
912DRX	Lon: 145:17:28.6		Start Date: 05/09	Area: DAS
	Owner: State	Unit: AKAKS-Alaska-Other		
DRX	Name: BISON RX			Cause: Human
4.0 Acreage On 05/09				

- Treat RX fires like a Wildfire. They get an incident and an incident number (but not from AICC)
- “RX” must be in the name
- Last 3 characters of fire number must have a numeral so easy to decipher on map
- Daily narrative if there was activity
- Daily cost
- Update acres daily as they are treated “burned”

TTY

TTY is a tool to communicate to other areas in AK via this “chat box.” All functional areas at AICC can be addressed as ‘AICC’ on the TTY.

Requesting a Fire Number

Request a fire number through AICC on the TTY.

Required Info

- Lat/Long
- Protection Level
- Land Status

Additional Info

- Size
- Rank
- Fuels
- Resources responding (air and ground)
- Requested resources from AICC (tankers, scoopers, Jumpers)

Example

AICC
Request for fire number:
64° 44.829
-148° 07.849
Protection Level: Full
Land Status: AK Dept. Natural Resources
1 acres *
Rank 2 – Creeping *
Dead White Spruce *
H-120 responding *
FAF, EAW 06/12/21

*Additional info

AICC will respond back with a fire number:

FAF

FIRE NUMBER FOR 64 44x-148 07: 221

AICC, AF, 07/22/19

The area dispatch office will then 'copy' AICC's message:

AICC

COPY FIRE # 221

FAF, LAW, 07/22/19

This notifies AICC that the local dispatch confirms they see the fire number on the TTY.

Crew

There are three main events in which Crews are required to be stated on the TTY: Crew Availability, Crew Movement and Crew Assignments. **Crew requests are processed through IROC.**

Crew Availability

When a crew becomes available or unavailable, state this on the TTY.

AICC
WHITE MOUNTAIN T2 IA
AVAILABLE GACC 5/15 @ 1300
FAF, MMP, 05/20/16 13:25

AICC
TCC TYPE 2IA CREW IS CURRENTLY UNAVAILABLE
NFDC, LGD, 05/17/22 14:50

AICC
AS OF 5/18/22
PIONEER PEAK IHC AVAILABLE STATEWIDE
GANNETT GLACIER TYPE 2 AVAILABLE STATEWIDE
PAQ, EB, 05/18/22 14:08

AICC
PIONEER PEAK UNAVAILABLE
PAQ, EAW, 7/7/18

Crew Movement

When a crew departs a location or arrives to a location, state this on the TTY.

AICC
FAIRBANKS 2 AS C-4
AK-FAS-000222
FRANK +22
DEPARTED FAF @ 16:30
EN ROUTE TO FIRE 222ETA 17:00
FAF, AMP, 07/13/2016

AICC
MIDNIGHT SUN IHC AS C-5
AK-TAS-000229
BOND +20
ARRIVED @ FIRE 229 @ 1720
NFDC, CCW, 08/01/2018

Crew Assignments

When a crew is assigned to a fire, state this on the TTY.

AICC
FAIRBANKS 1
ASSIGNED 7/04 @ 12:57
AS C-1; AK-FAS-000222
FAF, LAW 06/14/2016

False Alarms

When a fire number is declared a false alarm, follow false alarm protocol in IFM and state false alarm on TTY.

AICC

Fire 211223 is False Alarm

NFDC, LAW 07/21/21

NFDC

Copy FIRE # 211223 is F/A

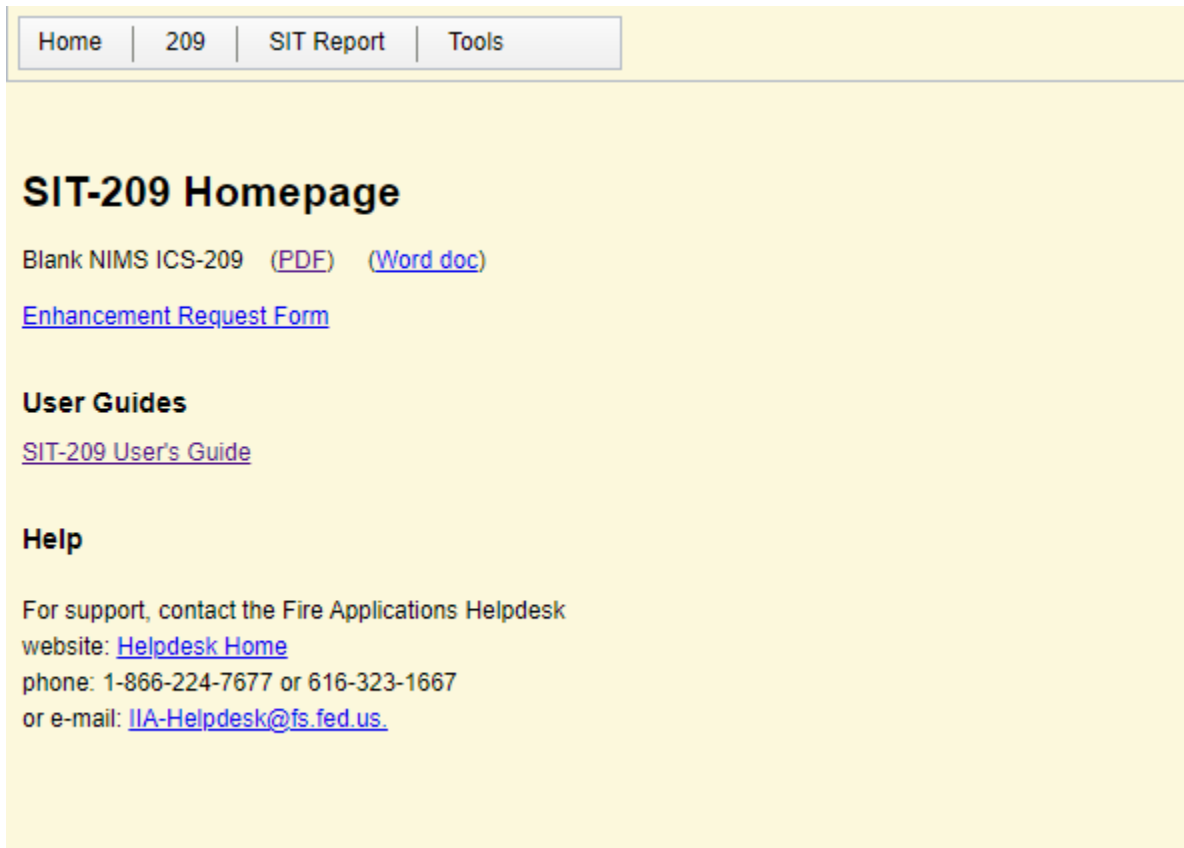

AICC, CEW 05/28/19

No need to list the number of false alarms.

209s

209s are a National Report for large wildfires and wildfires that have ‘significant resource commitment.’

209s are used to make decisions for resource allocation at a national level.

A screenshot of a web page titled "SIT-209 Homepage". At the top, there is a navigation bar with four items: "Home", "209", "SIT Report", and "Tools". Below the navigation bar, the main heading is "SIT-209 Homepage". Underneath, there are links for "Blank NIMS ICS-209 (PDF)" and "(Word doc)". A link for "Enhancement Request Form" is also present. The page is organized into sections: "User Guides" with a link to "SIT-209 User's Guide", and "Help" which provides contact information for the Fire Applications Helpdesk, including a website link, phone numbers, and an email address.

Home | 209 | SIT Report | Tools

SIT-209 Homepage

Blank NIMS ICS-209 ([PDF](#)) ([Word doc](#))

[Enhancement Request Form](#)

User Guides

[SIT-209 User's Guide](#)

Help

For support, contact the Fire Applications Helpdesk
website: [Helpdesk Home](#)
phone: 1-866-224-7677 or 616-323-1667
or e-mail: IIA-Helpdesk@fs.fed.us

Criteria for a 209:

- 100 acres or larger in Timber fuel **OR**
 - 300 acres in grass or brush fuel types **OR**
 - when a Type 1 or 2 Incident Management Team is assigned
- OR** (Alaska specific Criteria)
- 17 or more personnel for more than one burning period

209s are submitted daily.

Usually, you do not need to submit a 209 on the day it started (IA) unless a IMT was ordered or AICC requests.

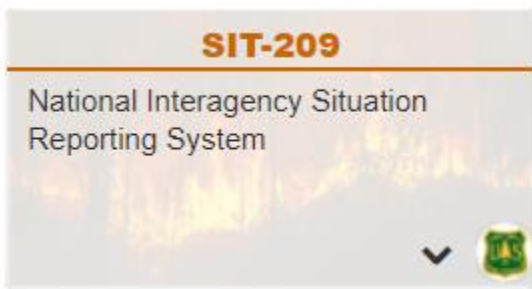

Requesting 209 User Roles

All dispatchers that are planning on entering 209 information must request access through FamAUTH.

Signing into the 209

Sign in through the FAMAuth Login

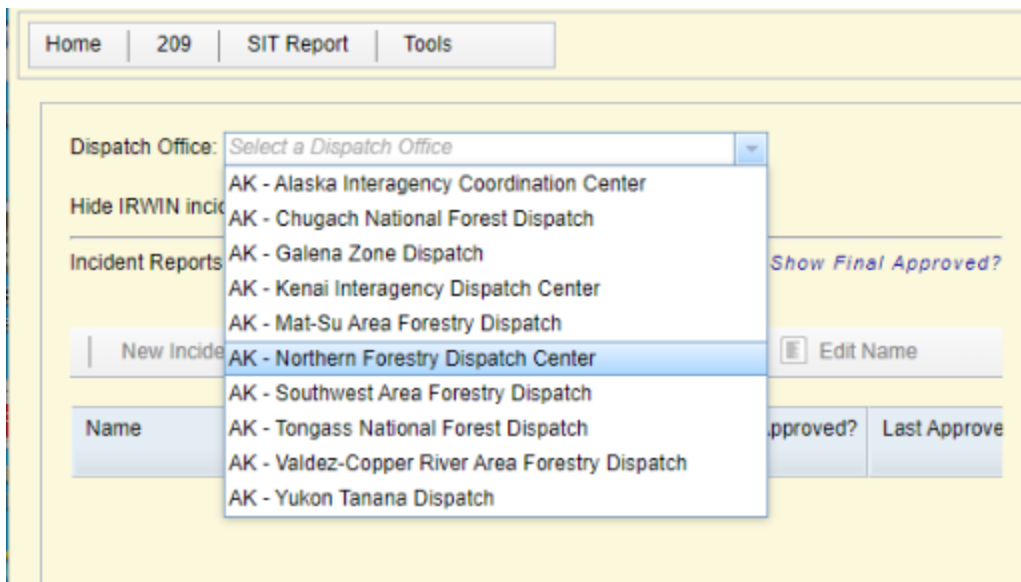

Select SIT-209

Select 209 > Data Entry

Select the appropriate dispatch office

Select appropriate fire and select 'Open'

Box 2 & 21

Box 2 and 21 look similar but they are different.

Incident Status Summary (ICS-209)

Incident: **Haystack**

1. Incident Name: Haystack		2. Incident Number: AK-FAS-111196	
3. Report Version (check one box): Initial <input checked="" type="checkbox"/> Update Final	4. Incident Commander(s) & Agency or Organization: Ed Sanford	5. Incident Management Organization: Type 2 Team	6. Incident Start Date/Time: Date: 06/14/2021 Time: 1845 AKDT
7. Current Incident Size or Area Involved (use unit label – e.g., "Acres", "Square Miles"): 924 Acres	8a. Percent (%) Contained or Completed: 77 % b. Total Percentage (%) of Perimeter that will be Contained or Completed: 100 %	9. Incident Type: Wildfire	10. Incident Complexity Level: <input checked="" type="checkbox"/> Single Complex
		9. Incident Description: C. Cause: Lightning/Natural D. Fire Suppression Strategy:	
		Strategy	Percent (%)
		Monitor	
		Confine	
		Point Zone Protection	
		Full Suppression	100
11. Report Time Period: From Date/Time: 06/23/2021 1800 AKDT To Date/Time: 06/24/2021 1800 AKDT			
12. Prepared By: Print Name: Casey Boespflug Date/Time Prepared: 06/24/2021 1900 AKDT		13. Approved By: Print Name: EdSanford Signature:	
14. Date/Time Submitted: 06/24/2021 1939 AKDT		15. Primary Location, Organization, or Agency Sent To: AICC	
16. State: AK	17. County / Parish / Borough: Fairbanks North Star	18. City:	
19. Unit or Other:	20. Incident Jurisdiction:	21. Incident Location Ownership (if different than jurisdiction): AK-DNS	

To find the answer to box 21 in the 209, look under land status in IFM.

Land Status: 2 entries - Unit: AK Dept. Natural Resources - Mgt. Option: Full - Size: 838.0 ac

Point of Origin Land Status:
Fiscal Responsibility: AK DNR | Jurisdictional Agency: AK DNR | Mgmt Option: Full | Unit: **AKDNS AK Dept. Natural Resources** | Size: 838 ac

Unit	Management Option	Size
AKDNS AK Dept. Natural Resources	Modified	43.0
AKDNS AK Dept. Natural Resources	Limited	46.2

Total Size (ac): 927.2

Fuels

Alaska uses the CFFRDS fuels model while most of the lower 48 uses the NFRDS fuel mode. When entering Alaska fuels into the 209, use the AK 209 Fuel Conversion Table for the closest “conversions.”

AK 209 Fuel Conversion Table	
CFFRDS - AK	NFRDS - 209/ L-48
Black Spruce	Timber (Litter & Understory)
Tundra	Brush (2 ft)
Deciduous/Hardwoods	Hardwood Litter

Entering Resources

To enter resources, use the ‘+ Add Row’ button to add the Agencies or Organizations.

+ Add Row ✖ Delete Selected Rows Show/Hide Resources								
49. Resources (summarize resources by category, kind, and/or type; show top half of box, show # of personnel associated with resource on bottom								
48. Agency or Organization	Crew, Type 1	Crew, Type 2	Crew, Type 2/A	Helicopter, Type 2	Helicopter, Type 3	Fixed Wing, Recon	50. # of Overhead Personnel	51. Total Personnel
AK resources	1							
personnel	21						0	21
52. Total resources	1							
personnel	21						0	21

Once the report is open, you can hover over each field number to get instructions for that Block.

Example: If you hover over the 48 below the first thing it says is Add Row.

209 Tips & Reminders

- Decisions on National scale made from these reports
- National Product! – correct spelling & grammar is important
- Options for Initial, Update, or Final. All fires have a Final, otherwise it's an 'Initial' if it's the first one or 'Update' there after
- Irwin feeds some initial info into location tab. If initial info is not populated in the 209, something is wrong.
- 'Monitor' large fire 209's need to be done weekly. Thursday nights are preferred by NICC.
- Look at 209 examples to get a feel for how they are written
- Not all boxes are required to be filled, look for *
- Usually, you don't have to submit a 209 on the first night/IA. You may be asked to do so to give NICC a heads up that AK has emerging incidents sucking up all local resources.
- Verify and THEN Approve.
- Get Firefighters in habit of calling in at certain time daily for 209. Start early! 1800 is a reasonable time.
- Unless the IC is really on top of their game and have all their answers ready (you will encounter some unicorns like this) most of the time you will have to read them each question.
- Read through 209 with IC and state what was reported previous night

- Speak slowly and clearly. They are very distracted and have a lot going on, it is essential to try to communicate clearly.
- Read the question and then state what was reported the previous night.
- You must delete previous night's note to add today's notes.
- Check with local protocol to see if you need approval before you are dispatched "Approve" and submit the report
- Having trouble? Email BLM_AK_ACCINT@blm.gov

Block by Block Instructions

NIMS ICS-209, Block by Block Instructions

Block Number	Block Title	Instructions
*1	Incident Name	<p>Enter the full name assigned to the incident. Check spelling of the full incident name. For an incident that is a Complex, use the word "Complex" at the end of the incident name. If the name changes, explain in Remarks, Block 47. Do not use the same incident name for different incidents in the same calendar year on the same unit. ("Smith" and "Smith 2" are acceptable.)</p>
*2	Incident Number	<p>Enter the appropriate number based on current guidance. The incident number may vary by jurisdiction and discipline. For wildland fire, use the incident number. Examples include: A computer-aided dispatch (CAD) number. An accounting number. A county number. A disaster declaration number. A combination of the State, unit/agency ID, and a dispatch system number. A mission number. Any other unique number assigned to the incident and derived by means other than those above. Make sure the number entered is correct. Unit identifiers must exist in the database to be valid for entry in this program. Do not use the same incident number for two different incidents in the same calendar year. Subordinate incident numbers associated with host jurisdictions or agencies and incident numbers assigned by agencies represented in Unified Command should be listed, or indicated in Remarks, Block 47.</p>
*3	Report Version (check one box)	<p>This indicates the current version of the ICS-209 form being submitted. If only one ICS-209 will be submitted (for an incident lasting one day), check Final.</p>
	<input type="checkbox"/> Initial	Check "Initial" if this is the first ICS-209 for this incident.
	<input type="checkbox"/> Update	Check "Update" if this is a subsequent report for the same incident. These can be submitted at various time intervals (see "Reporting Requirements" above).
	<input type="checkbox"/> Final	<p>Check "Final" if this is the last ICS-209 to be submitted for this incident (usually when the incident has been declared contained and/or when the incident requires only minor support that can be supplied by the organization having jurisdiction). An incident being merged into a complex should be marked as "Final" on its last 209. The name and incident number of the complex should be indicated in Remarks, Block 47.</p>
*4	Incident Commander(s)	<p>Enter the last name of the Incident Commander. If the incident is under a Unified Command, list primary Incident Commanders by last name separated by a slash. Denote the organizations in Remarks. For example: Lennon / Hendrix</p>

Block Number	Block Title	Instructions
5	Incident Management Organization	Indicate the incident management organization for the incident, which may be a Type 1, 2, or 3 Incident Management Team (IMT), a Unified Command, a Unified Command with an IMT, etc. If no team is assigned, leave blank.

Block Number	Block Title	Instructions
*6	Incident Start Date/Time	This is always the start date and time of the incident (not the report date and time or operational period).
	Date	Enter the start date (month/day/year).
	Time	Enter the start time (using 24-hour clock time).
7	Current Incident Size or Area Involved	<p>Enter the appropriate incident descriptive size or area involved (acres, number of buildings, square miles, hectares, square kilometers, etc.). Enter the total area involved for incident Complexes in this block, and list each sub-incident and size in Remarks (Block 47). Indicate that the size is an estimate if a more specific figure is not available. Incident size may be a population figure rather than a geographic figure, depending on the incident definition and objectives.</p> <p>If the incident involves more than one jurisdiction or mixed ownership, agencies/organizations may require listing a size breakdown by organization, or including this information in Remarks (Block 47). The incident may be one part of a much larger event (refer to introductory instructions under "Preparation). Incident size/area depends on the area actively managed within the incident objectives and incident operations, and may also be defined by a delegation of authority or letter of expectation outlining management bounds.</p> <p>Leave blank if not appropriate for incident.</p> <p>** The 209 program only accepts acres, hectares, square miles and square kilometers. Convert other area measurements to one of these when submitting an electronic 209 report.</p>
8	Percent (%) Contained or Completed	Enter the percent that this incident is completed or contained (e.g., 50%). For example, a spill may be 65% contained, or flood response objectives may be 50% met.
		8B. Enter the percent of perimeter left to be contained (if appropriate for the incident).
*9	Incident Type	Enter a general definition of the incident in this block.
		Example: If incident Type is "Biological Outbreak," text description might say "Swine Flu epidemic." Allows more detailed description of the incident.
*9 (cont.)	9C Cause Drop down menu for cause type:	Drop down menu. This is general information. Does not need to be specific. For example, select human for a terrorist event.

Block Number	Block Title	Instructions
	Lightning Human Other Under Investigation	
10	Incident Complexity Level	<p>Identify the incident complexity level as determined by Unified/Incident Commanders, if available or used.</p> <p>Incident Types Incidents may be typed in order to make decisions about resource requirements. Incident types are based on the following five levels of complexity. (Source: U.S. Fire Administration).</p> <p>NIMS incident type descriptions:</p> <p>Type 5: The incident can be handled with one or two single resources with up to six personnel. Command and General Staff positions (other than the Incident Commander) are not activated. No written Incident Action Plan (IAP) is required. The incident is contained within the first operational period and often within an hour to a few hours after resources arrive on scene. Examples include a vehicle fire, an injured person, or a police traffic stop.</p> <p>Type 4: Command staff and general staff functions are activated only if needed. Several resources are required to mitigate the incident. The incident is usually limited to one operational period in the control phase. The agency administrator may have briefings, and ensure the complexity analysis and delegation of authority are updated. No written Incident Action Plan (IAP) is required but a documented operational briefing will be completed for all incoming resources. The role of the agency administrator includes operational plans including objectives and priorities.</p> <p>Type 3: When capabilities exceed initial attack, the appropriate ICS positions should be added to match the complexity of the incident. Some or all of the Command and General Staff positions may be activated, as well as Division/Group Supervisor and/or Unit Leader level positions. A Type 3 Incident Management Team (IMT) or incident command organization manages initial action incidents with a significant number of resources, an extended attack incident until containment/control is achieved, or an expanding incident until transition to a Type 1 or 2 team. The incident may extend into multiple operational periods. A written IAP may be required for each operational period.</p> <p>Type 2: This type of incident extends beyond the capabilities for local control and is expected to go into multiple operational periods. A Type 2 incident may require the response of resources out of area, including regional and/or national resources, to effectively manage the operations, command, and general staffing. Most or all of the Command and General Staff positions are filled. A written IAP is required for each operational period. Many of the functional units are needed and staffed.</p>

Block Number	Block Title	Instructions
		<p>Operations personnel normally do not exceed 200 per operational period and total incident personnel do not exceed 500 (guidelines only). The agency administrator is responsible for the incident complexity analysis, agency administrator briefings, and the written delegation of authority.</p> <p>Type 1: This type of incident is the most complex, requiring national resources to safely and effectively manage and operate. All Command and General Staff positions are activated. Operations personnel often exceed 500 per operational period and total personnel will usually exceed 1,000. Branches need to be established. The agency administrator will have briefings, and ensure that the complexity analysis and delegation of authority are updated. Use of resource advisors at the incident base is recommended. There is a high impact on the local jurisdiction, requiring additional staff for office administrative and support functions.</p>
11	For Time Period	<p>Enter the time interval for which the form applies. This period should include all of the time since the last ICS-209 was submitted, or if it is the initial ICS-209, it should cover the time elapsed since the incident started. The time period may include one or more operational periods, based on agency/organizational reporting requirements.</p> <hr/> <p>From Date/Time</p> <p>Enter the date beginning date for this reporting period. Enter the time.</p> <hr/> <p>To Date/Time</p> <p>Enter the ending date for which the information in this report is pertinent to (likely will be the current date/time). Enter the end time.</p>

Block Number	Block Title	Instructions
APPROVAL & ROUTING INFORMATION		
*12	Prepared By	When an incident management organization is in place, this would be the Situation Unit Leader or Planning Section Chief at the incident. On other incidents, it could be a dispatcher in the local emergency communications center, or another staff person or manager.
	Print Name	Print the name of the person preparing the form. ICS position can be added here if desired.
	Date/Time Prepared	Enter the date (month/day/year) and time (using the 24-hour clock) the form was prepared.
*13	Approved By	When an incident management organization is in place, this would be the Planning Section Chief or Incident Commander at the incident. On other incidents, it could be the jurisdiction's dispatch center manager, organizational administrator, or other manager.
	Print Name	Print the name of the person approving the form.
	Date/time approved.	Add this: Program generated date/time stamp – not data entry by user) (Automatically created when final report is submitted to server.)
	Signature	Signature of the person approving the ICS-209, typically the Incident Commander, or designee. The original signed ICS-209 should be maintained with other incident documents.
*14	Date/Time Submitted	Program generated date/time stamp – not data entry by user)
*15	Primary Location, Organization, or Agency Sent To	Enter the appropriate primary location or office the ICS-209 was sent to apart from the incident. This most likely is the entity or office that ordered the incident management organization that is managing the incident. This may be a dispatch center or a MACS element such as an emergency operations center. If a dispatch center or other emergency center prepared the ICS-209 for the incident, indicate where it was submitted initially.

INCIDENT LOCATION INFORMATION		
<p>Much of the "Incident Location Information" in Blocks 16–26 is optional, but completing as many fields as possible increases accuracy, and improves interoperability and information sharing between disparate systems. As with all ICS-209 information, accuracy is essential because the information may be widely distributed and used in a variety of systems. Location and/or geospatial data may be used for maps, reports, and analysis by multiple parties outside the incident.</p> <p>Be certain to follow accepted protocols, conventions, or standards where appropriate when submitting location information, and clearly label all location information.</p> <p>Incident location information is usually based on the point of origin of the incident, and the majority of the area where the incident jurisdiction is.</p>		
*16	State	<p>Enter the State where the incident <i>originated</i>.</p> <p>If incident covers multiple states, enter the state first impacted, or where the epicenter was located (as in a hurricane or earthquake, etc.).</p> <p>If different from Block 2, edit manually.</p> <p>If other states or jurisdictions are involved, enter them in Block 25 or Remarks.</p>

*17	County / Parish / Borough	Enter the county, parish, or borough where the incident originated. If other counties or jurisdictions are involved, enter them in Block 25 or Block 47.
18	City	Enter the city where the incident originated. If other cities or jurisdictions are involved, enter them in Block 25 or Block 47.
19	Unit or Other (point of origin).	Enter the unit, sub-unit, unit identification (ID) number or code (if used), or other information about the primary agency with jurisdiction or responsibility for the incident (e.g., police, public works, etc.), or another type of organization. Data entry blocked for wildfire incidents (not needed).
20	Incident Jurisdiction	Enter the jurisdiction under which the incident originated (the entry may be general, such as Federal, city, or State, or may specifically identify agency, such as Warren County, U.S. Coast Guard, Panama City, NYPD).
*21	Ownership at Origin	Wildfire incidents should use established unit identifier business practices when entering ownership at point of origin. When relevant, indicate the ownership of the area where the incident originated. This may include situations where jurisdictions contract for emergency services, or where it is relevant to include ownership by private entities, such as a large industrial site.
22	Longitude: Latitude:	Enter the longitude and latitude where the incident originated, if available and normally used by the authority having jurisdiction for the incident. Clearly label the data, as longitude and latitude can be derived from various sources. For example, if degrees, minutes, and seconds are used, label as "33 degrees, 45 minutes, 01 seconds." NAD83 should be identified as the datum standard.
23	US National Grid Reference	Enter the US National Grid (USNG) reference where the incident originated, if available and commonly used by the agencies/jurisdictions with primary responsibility for the incident. Clearly label the data. NAD83 should be identified as the datum standard.
24	Legal Description (township, section, range)	Enter the legal description where the incident originated, if available and commonly used by the agencies/jurisdictions with primary responsibility for the incident. Clearly label the data (e.g., N 1/2 SE 1/4, SW 1/4, S24, T32N, R18E). I don't think that these coordinates need to be expressed more precisely than a 1/4 or a 1/4 section. That's to 40 acres. Any more finite than that and they should be using a GPS and giving us lat/long or UTM coordinates. Since legal descriptions are most commonly derived from USGS quadrangle maps, most are still published in NAD27 (datum is printed on the quad map). The datum should be provided by the user as either NAD27 or NAD83.
*25	Short Location or Area Description (list all affected areas or a reference point)	List all affected areas as described in instructions for Blocks 16–24 above, OR summarize a general location, OR list a reference point for the incident (e.g., "the southern third of Florida," "in ocean 20 miles west of Catalina Island, CA," or "within a 5 mile radius of Walden, CO"). This information is important for readers unfamiliar with the area (or with other location identification systems) to be able to quickly identify the general location of the incident on a map. Other location information may also be listed here if needed or relevant for incident support (e.g., base meridian).

26	UTM Coordinates	Indicate Universal Transverse Mercator reference coordinates if used by the discipline or jurisdiction. NAD83 should be identified as the datum standard.
27	Note any electronic geospatial data included or attached (indicate data format, content, and collection time information and labels)	If geospatial data is available, provide the following information: Provide a general description of the available data. For example, a perimeter, a point, an area of impact, a radius (such as an evacuation zone), or a line or lines (such as a pipeline). Indicate the data format (e.g., .shp, .kml, .kmz, or .gml file) and any relevant information about projection, etc. May include a hyperlink or other access information if incident map data is posted online or on an FTP (file transfer protocol) site to facilitate downloading and minimize information requests. May include a point of contact for getting geospatial incident information.

INCIDENT SUMMARY		
*28	Observed Fire Behavior or Significant Events for the Time Period (summarize significant progress made, evacuations, incident growth, etc.)	For wildfires, use this block for observed fire behavior. Use to describe fire behavior or significant events since the last report. Do not use this block for <i>anticipated</i> incident events, behavior or movement. For Wildland fire incidents: Describe the observed fire behavior for the current reporting period using generally accepted terminology. For Non-wildland fire incidents: Describe significant incident events related to the materials, agents, or people causing the incident. Provide additional information in Remarks, block 47 (if needed).
*29	Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc.)	When relevant, enter the appropriate primary materials, fuels, or other hazards involved in the incident that are leaking, burning, infecting, or otherwise influencing the incident.

30	Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc.)	Include a short summary of damage or use/access restrictions/ limitations caused by the incident for the reporting period, and cumulatively. Include, if needed, any information on the facility status, such as operational status, if it is evacuated, etc. when needed. Include any critical infrastructure or key resources damaged/destroyed/ impacted by the incident, the kind of infrastructure, and the extent of damage and/or impact and any known cascading impacts. Refer to more specific or detailed damage assessment forms and packages when they are used and/or relevant.
	A. Structural Summary	Complete this table as needed based on the definitions for 30B–G below. Note in text block if numbers entered are estimates or are confirmed.
	B. # Threatened (72 hrs)	Enter the number of structures potentially threatened by the incident within the next 72 hours, based on currently available information.
	C. # Damaged	Enter the cumulative number of structures damaged by the incident.
	D. # Destroyed	Enter the cumulative number of structures destroyed beyond repair by the incident.

	E. Single Residences	Enter the number of standalone single dwellings or homes impacted in columns 30B–D. Note any specifics in the text block if needed, such as type of residence (single-family homes, etc.).
	F. Multiple Residences	Apartment dwellings, duplexes, etc. Enter the number of single dwellings/homes/units impacted in columns 30B–D. Note any specifics in the text block if needed, such as type of residence (apartments, condominiums, etc.).
	G. Mixed Commercial / Residential	Mixed use structures, such as commercial business and apartments combined. Enter the number of single dwellings/homes/units impacted in Columns 30B–D. Note any specifics in the text block if needed, such as type of residence.
	H. Nonresidential Commercial Properties	Enter the number of buildings or units impacted in Columns 30B–D. This includes any primary structure used for nonresidential purposes, excluding Other Minor Structures. Note any specifics regarding building or unit types in the text block.
	I. Other Minor Structures	Enter any miscellaneous structures impacted in Columns 30B–D not covered in 30E–F above, including any minor structures such as booths, sheds, or outbuildings.

ADDITIONAL INCIDENT DECISION SUPPORT INFORMATION		
31	Public Status Summary	<p>This section is for summary information regarding incident-related injuries, illness, and fatalities for civilians (or members of the public). Negative values are permitted in column A to correct for over-reporting on a previous ICS-209 report for this incident.</p> <p>If values are estimated, explain in Block 47 – Remarks.</p> <p>Explain or describe the nature of any reported injuries, illness, or other activities in Life, Safety, and Health Status/Threat in Remarks block. Illnesses include those that may be caused through a biological event such as an epidemic or an exposure to toxic or radiological substances. Do not estimate fatality information.</p> <p>Please use caution when reporting information in this section that may be on the periphery of the incident or change frequently. This information should be reported as accurately as possible as a snapshot in time, as much of the information is subject to frequent change.</p> <p>Do not complete this block if the incident covered by the ICS-209 is <i>not directly responsible</i> for these actions (such as evacuations, sheltering, immunizations, etc.) <i>even if they are related to the incident.</i></p> <p>Only the authority having jurisdiction should submit reports for these actions, to mitigate multiple/conflicting reports.</p> <p>For example, if managing evacuation shelters is part of the incident operation itself, do include these numbers in Block 31J with any notes in Block 33.</p> <p><u>Handling Sensitive Information</u></p> <p>Release of information in this section should be carefully coordinated within the incident management organization to ensure synchronization with public information and investigative/intelligence actions. Thoroughly review the "Distribution" section in the introductory ICS-209 instructions for details on handling sensitive information. Use caution when providing information in any situation involving fatalities, and verify that appropriate notifications have been made prior to release of this information. Electronic transmission of any ICS-209 may make information available to many people and networks at once. Information regarding fatalities should be cleared with the Incident Commander and/or an organizational administrator prior to submission of the ICS-209.</p>
	A. # This Reporting Period	Enter the total number of individuals impacted in each category for this reporting period (since the previous ICS-209 was submitted).
	B. Total # to Date	Enter the total number of individuals impacted in each category for the entire duration of the incident. This is a cumulative total number that should be adjusted each reporting period.
	C. Indicate Number of Civilians (Public) Below	For lines 31D–M below, enter the number of civilians affected for each category. Indicate if numbers are estimates in Block 47 – Remarks. Civilians are those members of the public who are affected by the incident, but who are not included as part of the response effort through Unified Command partnerships and those organizations and agencies assisting and cooperating with response efforts.
	D. Fatalities	Enter the number of <i>confirmed</i> civilian/public fatalities. See information in introductory instructions ("Distribution") and in Block 31 instructions regarding sensitive handling of fatality information.

	E. With Injuries/Illness	Enter the number of civilian/public injuries or illnesses directly related to the incident. Injury or illness is defined by the incident or jurisdiction(s).
*31 (continued)	F. Trapped/In Need of Rescue	Enter the number of civilians who are trapped or in need of rescue due to the incident.
	G. Missing	Enter the number of civilians who are missing due to the incident. If number is estimated, note in Block 47 – Remarks.
	H. Evacuated	Enter the number of civilians who are evacuated due to the incident. If number is estimated, note in Block 47 – Remarks.
	I. Sheltering-in-Place	Enter the number of civilians who are sheltering in place due to the incident. Indicate if estimates are used in Remarks – Block 47.
	J. In Temporary Shelters	Enter the number of civilians who are in temporary shelters as a direct result of the incident. If number is estimated, note in Block 47 – Remarks.
	K. Have Received Mass Immunizations	Enter the number of civilians who have received mass immunizations due to the incident and/or as part of incident operations. Do not estimate.
	L. Require Mass Immunizations	Enter the number of civilians who require mass immunizations due to the incident and/or as part of incident operations. If number is estimated, note in Block 47 – Remarks.
	M. In Quarantine	Enter the number of civilians who are in quarantine due to the incident and/or as part of incident operations. Do not estimate.
	N. Other	Enter the number of civilians impacted, affected, displaced, or otherwise involved in the incident. This includes incidents specific to people (e.g. mass protests, large public gatherings, etc.). If necessary, provide detailed information in Block 47 (Remarks).
	O. Total # Civilians (Public) Affected	Program sums totals for Columns 31A and 31B for Rows 31D–M.

32	Responder Status Summary	<p>This section is for summary information regarding incident-related injuries, illness, and fatalities for responders; see 32C–N. Illnesses include those that may be related to a biological event such as an epidemic or an exposure to toxic or radiological substances directly in relation to the incident.</p> <p>Explain or describe the nature of any reported injuries, illness, or other activities in Block 33.</p> <p>NOTE: <i>Do not estimate any fatality information or responder status information.</i></p> <p>NOTE: Please use caution when reporting information in this section that may be on the periphery of the incident or change frequently. This information should be reported as accurately as possible as a snapshot in time, as much of the information is subject to frequent change.</p> <p>NOTE: Do not complete this block if the incident covered by the ICS-209 is <i>not directly responsible</i> for these actions (such as evacuations, sheltering, immunizations, etc.) even if they are related to the incident. Only the authority having jurisdiction should submit reports for these actions, to mitigate multiple/conflicting reports.</p> <p><u>Handling Sensitive Information</u></p> <p>Release of information in this section should be carefully coordinated within the incident management organization to ensure synchronization with public information and investigative/intelligence actions. Thoroughly review the “Distribution” section in the introductory ICS-209 instructions for details on handling sensitive information. Use caution when providing information in any situation involving fatalities, and verify that appropriate notifications have been made prior to release of this information. Electronic transmission of any ICS-209 may make information available to many people and networks at once. Information regarding fatalities should be cleared with the Incident Commander and/or an organizational administrator prior to submission of the ICS-209.</p>
----	---------------------------------	---

32 (continued)	A. # This Reporting Period	Enter the total number of responders impacted in each category for this reporting period (since the previous ICS-209 was submitted).
	B. Total # to Date	Enter the total number of individuals impacted in each category for the <i>entire duration</i> of the incident. This is a <i>cumulative</i> total number that should be adjusted each reporting period.
	C. Indicate Number of Responders Below	For lines 32D–M below, enter the number of responders relevant for each category. Responders are those personnel included as part of Unified Command partnerships and those organizations and agencies assisting and cooperating with response efforts.
	D. Fatalities	Enter the number of <i>confirmed</i> responder fatalities. See information in introductory instructions ("Distribution") and for Block 32 regarding sensitive handling of fatality information.
	E. With Injuries/Illness	Enter the number of incident responders with serious injuries or illnesses due to the incident. <i>For responders, serious injuries or illness are typically those in which the person is unable to continue to perform in his or her incident assignment, but the authority having jurisdiction may have additional guidelines on reporting requirements in this area.</i>
	F. Trapped/In Need Of Rescue	Enter the number of incident responders who are in trapped or in need of rescue due to the incident.
	G. Missing	Enter the number of incident responders who are missing due to incident conditions.
	H. Evacuated	Enter the number of civilians who are evacuated due to the incident. If number is estimated, note in Block 47 – Remarks.
	I. Sheltering in Place	Enter the number of responders who are sheltering in place due to the incident. Once responders become the victims, this needs to be noted in Block 33 or Block 47 and handled accordingly.
	J. In Temporary Shelters	Enter the number of civilians who are in temporary shelters as a direct result of the incident, noting if the number is an estimate in Block 47.
	L. Require Immunizations	Enter the number of responders who require immunizations due to the incident and/or as part of incident operations.
	M. In Quarantine	Enter the number of responders who are in quarantine as a direct result of the incident and/or related to incident operations.
	N. Other	Enter the number of civilians impacted, affected, displaced, or otherwise involved in the incident. This includes incidents specific to people (e.g. mass protests, large public gatherings, etc.). If necessary, provide detailed information in Block 47 (Remarks).
	O. Total # Responders Affected	Program sums totals for Columns 31A and 31B for Rows 31D–M.

33	Life, Safety, and Health Status/Threat Remarks	<p>Enter any details needed for Blocks 31, 32, and 34. Enter any specific comments regarding illness, injuries, fatalities, and threat management for this incident, such as whether estimates were used for numbers given in Block 31.</p> <p>This information should be reported as accurately as possible as a snapshot in time, as much of the information is subject to frequent change.</p> <p>Evacuation information can be very sensitive to local residents and officials. Be accurate in the assessment.</p> <p>Clearly note primary responsibility and contacts for any activities or information in Blocks 31, 32, and 34 that may be caused by the incident, but that are being managed and/or reported by other parties.</p> <p>Provide additional explanation or information as relevant in Remarks (Block 47).</p>
*34	Life, Safety, and Health Threat Management	<p>Check all that apply (at least one must be checked). If B through N don't pertain to your incident, check A, No likely Threat.</p> <p>Note any details in Life, Safety, and Health Status/Threat Remarks (Block 33), and provide additional explanation or information as relevant in Blocks 28, 36, 38, 40, 41, or in Remarks (Block 47).</p> <p>A. No Likely Threat Check if there is no likely threat to life, health, and safety.</p> <p>B. Potential Future Threat Check if there is a potential future threat to life, health, and safety.</p> <p>C. Mass Notifications In Progress Check if there are any mass notifications in progress regarding emergency situations, evacuations, shelter in place, or other public safety advisories related to this incident. These may include use of threat and alert systems such as the Emergency Alert System or a "reverse 911" system. Please indicate the areas where mass notifications have been completed (e.g., "mass notifications to ZIP codes 50201, 50014, 50010, 50011," or "notified all residents within a 5-mile radius of Gatlinburg").</p> <p>D. Mass Notifications Completed Check if actions referred to in Block 34C above have been completed.</p> <p>E. No Evacuation(s) Imminent Check if evacuations are not anticipated in the near future based on current information.</p> <p>F. Planning for Evacuation Check if evacuation planning is underway in relation to this incident.</p> <p>G. Planning for Shelter-in-Place Check if planning is underway for shelter-in-place activities related to this incident.</p> <p>H. Evacuation(s) in Progress Check if there are active evacuations in progress in relation to this incident.</p> <p>I. Shelter-In-Place in Progress Check if there are active shelter-in-place actions in progress in relation to this incident.</p> <p>J. Repopulation in Progress Check if there is an active repopulation in progress related to this incident.</p> <p>K. Mass Immunization in Progress Check if there is an active mass immunization in progress related to this incident.</p> <p>L. Mass Immunization Complete Check if a mass immunization effort has been completed in relation to this incident.</p> <p>M. Quarantine in Progress Check if there is an active quarantine in progress related to this incident.</p> <p>N. Area Restriction in Effect Check if there are any restrictions in effect, such as road or area closures, especially those noted in Block 28.</p>

35	Weather Concerns	<p>A synopsis of current and predicted weather; discuss related factors that may cause concern.</p> <p>Complete a short synopsis/discussion on significant weather factors that could cause concerns for the incident when relevant.</p> <p>Include current and/or predicted weather factors, and the timeframe for predictions.</p> <p>Include relevant factors such as:</p> <ul style="list-style-type: none"> Wind speed (label units, such as mph). Wind direction (clarify and label where wind is coming from and going to in plain language – e.g., “from NNW,” “from E,” or “from SW”). Temperature (label units, such as F degrees). Relative humidity (label %). Severe weather (e.g. thunderstorms, lightning, or high temperatures). Weather watches, advisories, or warnings. Tides and currents, etc. Any other weather information relative to the incident, such as flooding, hurricanes, etc.
*36	Projected Incident Activity, Potential, Movement, Escalation, or Spread 12 hours: 24 hours: 48 hours: 72 hours: Anticipated beyond 72 hours:	<p>Influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour timeframes.</p> <p>Provide an estimate (when it is possible to do so) of the direction/scope in which the incident is expected to spread, migrate, or expand during the next indicated operational period, or other factors that may cause activity changes.</p> <p>Discuss incident potential relative to values at risk, or values to be protected (such as human life), and the potential changes to those as the incident changes.</p> <p>Include an estimate of the acreage or area that will likely be affected.</p> <p>If known, provide the above information in 12-, 24-, 48- and 72-hour timeframes, and any activity anticipated after 72 hours.</p>
37	Strategic Objectives (define planned end-state for incident).	<p>Briefly discuss the desired outcome for the incident based on currently available information. Note any high-level objectives and any possible strategic benefits as well (especially for planned events).</p> <p>For example, contain, control, or monitor a wildfire incident. For non-fire incidents information could include repopulating an area, structure stabilization, mitigating a spill, etc.</p>

<p>*38</p>	<p>Current Incident Threat Summary and Risk Information Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts. 12 hours: 24 hours: 48 hours: 72 hours: Anticipated beyond 72 hours:</p>	<p>Enter threat and risk information for each timeframe. Summarize major or significant threats due to incident activity based on currently available information. Include a breakdown of threats in terms of 12-, 24-, 48-, and 72-hour timeframes.</p>
<p>39</p>	<p>Critical Resource Needs 12 hours: 24 hours: 48 hours: 72 hours: Anticipated after 72 hours:</p>	<p>List only resources needed to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order. Do not use this block for noncritical resources. List the specific critical resources and numbers needed, in order of priority. <i>Be specific as to the need.</i> Use plain language and common terminology for resources, and indicate resource category, kind, and type (if available or known) to facilitate incident support. If critical resources are listed in this block, there should be corresponding orders placed for them through appropriate resource ordering channels. Provide critical resource needs in 12-, 24-, 48- and 72-hour increments. List the most critical resources needed for each timeframe, if needs have been identified for each timeframe. Listing critical resources by the time they are needed gives incident support personnel a "heads up" for short-range planning, and assists the ordering process to ensure these resources will be in place when they are needed. More than one resource need may be listed for each timeframe. For example, a list could include: 24 hrs: 3 Type 2 firefighting helicopters, 2 Type I Disaster Medical Assistance Teams 48 hrs: Mobile Communications Unit (Law/Fire) After 72 hrs: 1 Type 2 Incident Management Team</p>

40	Strategic Discussion:	<p>Explain the relation of overall strategy, constraints, and current available information to:</p> <ol style="list-style-type: none"> 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results. <p>Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.</p> <p>Wording should be consistent with Block 39 to justify critical resource needs, which should relate to planned actions in the Incident Action Plan. Give a short assessment of the likelihood of meeting the incident management targets, given the current management strategy and currently known constraints.</p> <p>Identify when the chosen management strategy will succeed given the current constraints. Adjust the anticipated incident management completion target in Block 43 as needed based on this discussion. Explain major problems and concerns as indicated.</p>
41	Planned Actions for Next Operational Period	<p>Provide a short summary of actions planned for the next operational period.</p> <p>Examples:</p> <p>"Continue holding Division A."</p> <p>"The current Incident Management Team will transfer command to another IMT."</p> <p>"Continue to review operational/ engineering plan to facilitate removal of the partially collapsed west bridge supports."</p> <p>"Continue refining mapping of the recovery operations and damaged assets using GPS."</p> <p>"Initiate removal of unauthorized food vendors."</p>
42	Projected Final Incident Size/Area	<p>If known, enter the projected final incident size. Use unit label – e.g., "sq mi."</p> <p>Enter an estimate of the total area likely to be involved or affected over the course of the incident.</p> <p>Label the estimate of the total area or population involved, affected, or impacted with the relevant units such as acres, hectares, square miles, etc.</p> <p>Note that total area involved may not be limited to geographic area (see previous discussions regarding incident definition, scope, operations, and objectives). Projected final size may involve a population rather than a geographic area.</p> <p>Units of area include: Acres, Hectares, Sq. Miles, Sq. Kilometers, City Blocks, etc.</p>
43	Anticipated Incident Containment or Completion Date	<p>For wildfire incidents this is the expected containment date.</p> <p>For non-fire incidents this is the date at which the incident is expected to be closed or when significant incident support will be discontinued.</p> <p>Enter the date (month/day/year) at which time it is expected that incident objectives will be met. Avoid leaving this block blank if possible, as this is important information for managers. However, if unknown, leave blank.</p>
44	Projected Significant Resource Demobilization Start Date	<p>Enter the date (month/day/year) when initiation of <u>significant</u> resource demobilization is anticipated.</p>

45	Estimated Incident Costs to Date	<p>Enter the estimated total incident costs to date for the entire incident based on currently available information.</p> <p>Incident costs include estimates of all costs for the response, including all management and support activities per discipline, agency, or organizational guidance and policy.</p> <p>This does not include damage assessment figures, as these are impacts from the incident and not response costs.</p> <p>If costs decrease, explain in Remarks (Block 47).</p> <p>If additional space is required, please add as an attachment.</p> <p>Part B: For wildfire incidents, enter the FireCode number.</p>
46	Projected Final Incident Cost Estimate	<p>Enter an estimate of the total costs for the incident once all costs have been processed based on current spending and projected incident potential, per discipline, agency, or organizational guidance and policy. This is often an estimate of daily costs combined with incident potential information.</p> <p>This does not include damage assessment figures, as they are impacts from the incident and not response costs.</p> <p>If additional space is required, please add as an attachment.</p>
47	Remarks (or continuation of any blocks above – list block number in notation)	<p>Use this block to expand on information that has been entered in previous blocks, or to include other pertinent information that has not been previously addressed.</p> <p>List the block number for any information continued from a previous block.</p> <p>Additional information may include more detailed weather information, specifics on injuries or fatalities, threats to critical infrastructure or other resources, more detailed evacuation site locations and number of evacuated, information or details regarding incident cause, etc.</p> <p>If complex was not checked in Block 9, then complex information may be added in this block. List all sub-incidents included in the Complex, including name, suppression strategy, percent contained, size and costs to date.</p> <p>List jurisdictional or ownership breakdowns if needed when an incident is in more than one jurisdiction and/or ownership area. Breakdown may be: By size (e.g., 35 acres in City of Gatlinburg, 250 acres in Great Smoky Mountains), and/or</p> <p>By geography (e.g., incident area on the west side of the river is in jurisdiction of City of Minneapolis; area on east side of river is City of St. Paul jurisdiction; river is joint jurisdiction with USACE).</p> <p>Explain any reasons for incident size reductions or adjustments (e.g., reduction in acreage due to more accurate mapping).</p> <p>This section can also be used to list any additional information about the incident that may be needed by incident support mechanisms outside the incident itself. This may be basic information needed through multiagency coordination systems or public information systems (e.g., a public information phone number for the incident, or the incident Web site address).</p>

INCIDENT RESOURCE COMMITMENT SUMMARY

This last/fourth page of the ICS-209 can be copied and used if needed to accommodate additional resources, agencies,

or organizations. Write the actual page number on the pages as they are used. Include only resources that have been assigned to the incident and that have arrived and/or been checked in to the incident. Do not include resources that have been ordered but have *not* yet arrived.

For summarizing:

When there are large numbers of responders, it may be helpful to group agencies or organizations together. Use the approach that works best for the multiagency coordination system applicable to the incident. For example, Group State, local, county, city, or Federal responders together under such headings, or Group resources from one jurisdiction together and list only individual jurisdictions (e.g., list the public works, police, and fire department resources for a city under that city's name).

On a large incident, it may also be helpful to group similar categories, kinds, or types of resources together for this summary.

48	Agency or Organization	<p>By agency enter the number of resources in the top row for that agency.</p> <p>Agencies or organizations should be listed individually. When resources are grouped together, individual agencies or organizations may be listed below in Block 53.</p> <p>Indicate in the rows under Block 49 how many resources are assigned to the incident under each resource identified. These can listed with the number of resources on the top of the box, and the number of personnel associated with the resources on the bottom half of the box.</p>
49	Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box)	<p>For each agency enter the number of resources in the top row for that agency. In the second row for that agency, enter the number of personnel assigned to those resources.</p> <p>For example: If there are three BLM engines with nine personnel assigned, then that row for BLM should show "3" in the top row, and "9" in the lower row.</p> <p>Strike teams must be counted as single resources (i.e. a strike team of engines should be entered as 5 engines).</p> <p><u>NOTE:</u> Similar resource types can be aggregated together when it is sensible to do so for the summary.</p> <p><u>NOTE:</u> Individual overhead personnel should be included in the Total Personnel sums in Block 51.</p>
50	# of Overhead and Support Personnel	<p>List the number of additional overhead and other personnel by agency or organization that are not assigned to a specific resource listed in Block 49.</p> <p>Example: If there are nine crewmembers assigned to three Type 4 engines for the BLM, these should be reported in Block 49.</p>
51	Total Personnel	<p>Includes personnel associated with resources (e.g., aircraft or engines), and individual overhead personnel:</p> <p><u>NOTE:</u> Personnel are automatically counted by the program. Resources are not manually totaled here by the user.</p>
52	Total Resources	<p>Resources (engines, crews, helicopters, etc.) are automatically calculated by the program. Personnel are not counted here.</p>
53	Additional Cooperating and Assisting Organizations Not Listed Above	<p>List all agencies and organizations involved in the incident that are not listed in Block 48. These organizations WILL NOT be counted by the program, or included in the totals in Blocks 51 and 52. Examples may include ambulance services, Red Cross, utility companies, etc.</p> <p>Do not repeat any resources counted in Blocks 48–52, unless explanations are needed for groupings created under Block 48 (Agency or Organization).</p>

	L. Mass Immunization Complete	
	M. Quarantine in Progress	
	N. Area Restriction in Effect	
	O. Road Closure	
P. Trail Closure		
Q. Area Closure	X	

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

Growth expected in areas of the fire not secured by fireline.

12 hours: **Growth expected to the east potentiality to the southeast if the indirect retardant line is unsuccessful. Fire will continue to consume unburned fuel to the north along the Yukon River.**

24 hours:

48 hours:

72 hours:

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: **Dalton Highway and Trans-Alaska Pipeline. Native Allotments and structures. Public campgrounds, airstrips and Yukon River traffic.**

24 hours:

48 hours:

72 hours:

Anticipated after 72 hours:

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: **Boats and boat operators for river operations.**

24 hours:

48 hours:

72 hours:

Anticipated after 72 hours:

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

1) critical resource needs identified above,

Incident Status Summary (ICS-209)

Incident: **Isom Creek**

2) the Incident Action Plan and management objectives and targets, 3) anticipated results. Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts. Consider appropriate long term strategies and keep agency admin informed. Evaluate potential implications of close person to person contact due to Covid-19. Keep the fire S and E of Yukon river. Provide protection for all identified structures. Keep public informed. Work with DOT. Notify Stevens Village in the event of heavy smoke impact										
41. Planned Actions for Next Operational Period: Continue to use ground and aerial resources to slow fire growth. Continue to construct and secure line. Secure structure protect and mop-up. Continue and expand river operations to contain and mitigate spot fires north of the Yukon River. Team transition from the Type 3 organization to the Type 2 IMT.										
42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):										
43. Anticipated Incident Containment or Completion Date: 07/11/2020										
44. Projected Significant Resource Demobilization Start Date:

Incident Status Summary (ICS-209)

Incident: **Munson Creek**

Narrative:
Most of the fire experienced very minimal fire activity. The southeast side of the fire did not receive much precipitation and torching was observed. Smoldering observed on west perimeter of fire in pockets of heavy fuel.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

Timber (Grass and Understory)

Narrative:
Black Spruce

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):
With the current fuel conditions only the structures within and near the Chena Hotsprings Resort likely to be threatened within 72 hours. There are an additional 60+ along the south side of Chena Hotsprings Road to milepost 42 which have been prepped, and assessments of structures on the north side of the road is ongoing.

A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
E. Single Residences	0	0	0
F. Multiple Residences	0	0	0
G. Mixed Commercial / Residential	47	0	0
H. Nonresidential Commercial Property	0	0	0
I. Other Minor Structures	0	0	0

31. Public Status Summary:

C. Indicate the Number of Civilians (Public) Below:

N. Total # Responders Affected:	1	4	5

33. Life, Safety, and Health Status/Threat Remarks:

Threat to Chena Hot Spring Resort and surrounding residences. Also threats to the recreation area. Trails closed to the public. Structures at milepost 45 and north, including cabins on North Fork Chena are at READY. Everything past milepost 48 is GO. Brown bears have

34. Life, Safety, and Health Threat Management:

	Active?
A. No Likely Threat	

Incident Status Summary (ICS-209)

Incident: **Munson Creek**

<p>been spotted near the helibase and a black bear has been in camp at 48 Mile Spike. There are 28 residents along Chena Hotsprings Rd that are sheltering in place and an additional 30 visitors and staff at the resort. Operations in close proximity to serial arson activity.</p> <p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern): A continuing warming trend is forecast through the weekend, however, daily showers are expected and no immediate return to active burning conditions. A dry cold front is expected to approach the fire area Monday and pass over the fire area on Tuesday bringing hot and windy conditions with highs in the upper 70's and west winds in the 15-25 mph range.</p>	<table border="1" style="width: 100%;"> <thead> <tr> <th style="width: 80%;"></th> <th style="width: 20%;">Active?</th> </tr> </thead> <tbody> <tr><td>B. <p>36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:</p> <p>12 hours: Little spread is expected</p> <p>24 hours: Little spread is expected.</p> <p>48 hours: With the two days of warming and drying some spread is expected in areas that don't receive heavy precip.</p> <p>72 hours: With the three days of warming and drying some spread is expected in areas that don't receive heavy precip. A dry cold front expected to approach the fire bringing higher temperatures and strong west winds.</p> <p style="text-align: center;">If warming and drying are sustained there is potential to spread in all directions except areas in Critical Protect Option directly south of the resort where crews are securing the fire edge. The majority of the fire is in limited protection option so it will likely spread until season-ending rainfall arrives, primarily to the northeast and east.</p>	
---	--

<p>37. Strategic Objectives (define planned end-state for incident): Point protection for structures and other values at risk along the Chena Hot Springs Road from milepost 42 to the resort, and along the West Fork River. Direct suppression tactics may be used to keep the fire south and east of the Chena River.</p>	
--	--

<p>38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:</p> <p>12 hours: The fire is not actively spreading and there is very little risk to values in the area.</p> <p>24 hours: The fire is not expected to spread actively and there is very little risk to values in the area.</p> <p>48 hours: With the warming and drying trend, the fire may begin to actively spread and has the potential to threaten value adjacent to it, however, protection measures are in place on all threatened values.</p>	
---	--

Incident Status Summary (ICS-209)

Incident: **Munson Creek**

<p>With the warming and drying trend, the fire may begin to actively spread and has the potential to threaten value adjacent to it, however, protection measures are in place on all threatened values.</p>												
<p>Anticipated after 72 hours: If there is a return to warm, dry, windy weather structures at the resort, along Chena Hot Springs Road, and the Middle Fork may be threatened.</p>												
<p>39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:</p>												
<p>12 hours: 2 x SEC2</p>												
<p>24 hours:</p>												
<p>48 hours:</p>												
<p>72 hours:</p>												
<p>Anticipated after 72 hours:</p>												
<p>40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:</p> <ol style="list-style-type: none"> 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results. <p>Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.</p> <p>Chena Hot Springs Resort is a heavily trafficked tourist destination. On any given day there approximately 120+ tourist and resort staff on site. The fire reached the resort and evacuation level 'Go' is in place. The resort owner, staff, and many guests are sheltering in place. The fire is having a negative economic impact on the resort and the resort owner does not intend to cease operations and is encouraging those with reservations to come to the resort.</p> <p>Fire activity has moderated and crews are making good progress securing the fire edge directly south of the resort but there is still a lot of areas where the fire could move north and threaten values when there is a return to active burning conditions.</p>												
<p>41. Planned Actions for Next Operational Period:</p> <p>Crews will continue to mop up the fire edge south of Chena Hot Springs Resort from Bear Paw Butte to the resort Aurorium. Structure protection activities will continue for structures on the north side of CHSR. Assessments and planning for the protection of values along West Fork River will continue. Fire personnel will support Fairbanks Area with Initial Attack resources.</p>												
<p>42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):</p>												
<p>43. Anticipated Incident Containment or Completion Date: 07/30/2021</p>												
<p>44. Projected Significant Resource Demobilization Start Date:</p>												
<p>45. Estimated Incident Costs to Date: \$993,261.00</p>												
<p>46. Projected Final Incident Cost Estimate:</p>												
<p>47. Remarks (or continuation of any blocks above – list block number in notation):</p>												
<p>49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):</p>

Make A List

During a busy shift, it's easy to lose track of what fires need to be completed.

Make a list of each fire that has been visited and at the end of the night, confirm that each of those fires has these steps completed:
